General Annotations	ENTREZ_GENE_SUMMARY	The protein encoded by this gene belongs to the highly conserved characterized by a dramatic periodicity in protein abundance throu regulators of CDK kinases. Different cyclins exhibit distinct expres contribute to the temporal coordination of each mitotic event. This as a regulatory subunit of CDK4 or CDK6, whose activity is required has been shown to interact with tumor suppressor protein Rb and positively by Rb. Mutations, amplification and overexpression of th are observed frequently in a variety of human cancers. [provided b
General Annotations	UP_COMMENT_DISEASE	Multiple myeloma (MM) [MIM:254500]: A malignant tumor of plasm and characterized by diffuse involvement of the skeletal system, h and anemia. Complications of multiple myeloma are bone pain, hy compression. The aberrant antibodies that are produced lead to im a high prevalence of infection. Amyloidosis may develop in some p spectrum of diseases ranging from monoclonal gammopathy of u leukemia. {ECO:0000269|PubMed:8695815}. Note=The gene repre pathogenesis. A chromosomal aberration involving CCND1 is foun (q13;q32) with the IgH locus.
General Annotations	UP_COMMENT_DISEASE	Note=A chromosomal aberration involving CCND1 may be a cause mantle-cell lymphoma (MCL). Translocation t(11;14)(q13;q32) with CCND1 may be oncogenic by directly altering progression through PubMed:1826542, ECO:0000269|PubMed:8204893, ECO:0000269
General Annotations	UP_COMMENT_DISEASE	Note=A chromosomal aberration involving CCND1 may be a cause t(11;11)(q13;p15) with the parathyroid hormone (PTH) enhancer. {
General Annotations	UP_COMMENT_FUNCTION	Regulatory component of the cyclin D1-CDK4 (DC) complex that ph retinoblastoma (RB) protein family including RB1 and regulates the (PubMed:1827756, PubMed:1833066, PubMed:19412162, PubMed PubMed:8302605). Phosphorylation of RB1 allows dissociation of complex and the subsequent transcription of E2F target genes whi through the G(1) phase (PubMed:1827756, PubMed:1833066, Pub PubMed:8302605). Hypophosphorylates RB1 in early G(1) phase (PubMed:19412162, PubMed:8114739, PubMed:8302605). Cyclin D various mitogenenic and antimitogenic signals (PubMed:1827756, PubMed:8302605). Also a substrate for SMAD3, phosphorylating S repressing its transcriptional activity (PubMed:15241418). Compo

Literature	GENERIF_SUMMARY	Presence in bone marrow cells indicated diagnosis of multiple my
Literature	GENERIF_SUMMARY	results suggest a model where RNA polymerase II bound at IgH re promoter by either long-range polymerase transfer or tracking
Literature	GENERIF_SUMMARY	cyclin D1-positive tumors tend to have perineural invasion more fre factor related to cyclin D1 reactivity of the cells.
Literature	GENERIF_SUMMARY	The CCND1 variant A allele may recessively increase the risk of ca superficial bladder cancer.
Literature	GENERIF_SUMMARY	Data show that CCND1 promoter activation by estrogens in human recruitment of a c-Jun/c-Fos/estrogen receptor alpha/progesteron phorbol acetate-responsive element of the gene.
Literature	GENERIF_SUMMARY	Cyclin D1, p53, and p21Waf1/Cip1 have roles in progression of ser
Literature	GENERIF_SUMMARY	Data suggest that cyclin D1-Cdk2 complexes mediate some of the demonstrate that the cyclin D1-Cdk2 fusion protein is a useful mo cyclin D1-Cdk2 complexes.
Literature	GENERIF_SUMMARY	Review of Cyclin D1 overexpression in squamous cell head and ne chromosome 11q13.
Literature	GENERIF_SUMMARY	Synthesis is regulated by combined activity of ErbB2 and FGFR-4 t
Literature	GENERIF_SUMMARY	regulation by SNIP1
Literature	GENERIF_SUMMARY	Tumor growth inhibition might be due to apoptosis caused by redu immunohistochemical analysis of tumor samples.
Literature	GENERIF_SUMMARY	Expression levels of CCND1 predict the cellular effects of mTOR in
Literature	GENERIF_SUMMARY	C-terminal sequences direct cyclin D1-CRM1 binding
Literature	GENERIF_SUMMARY	cyclin D1 binding to the androgen receptor NH2-terminal domain i
Literature	GENERIF_SUMMARY	estrogen receptor mediates cyclin D1 expression and growth of ta
Literature	GENERIF_SUMMARY	CCND1 gains are early events in ovarian tumorogenesis.
Literature	GENERIF_SUMMARY	CCND1 alternate transcripts encode proteins with differing functio
Literature	GENERIF_SUMMARY	overexpression of FAK promoted exit from G(1) in glioblastoma ce while reducing expression of p27(Kip1) and p21(Waf1), and enhan dependent kinase-4 (cdk4) complex
Literature	GENERIF_SUMMARY	In colorectal cancer, the CCND1 copy number increase was neithe and grade) nor with the tumor localization (colon, rectum or sigmo
Literature	GENERIF_SUMMARY	Cyclin D1 central domain could be exploited to develop novel prost
Literature	GENERIF_SUMMARY	Cyclin D1 protein is upregulated in epithelioid sarcoma, suggesting sarcoma and appears to be regulated by translational and/or post-
Literature	GENERIF_SUMMARY	Endogenously released IGF-I leads to constitutive cyclin D1 expres

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	expression level of cyclin D1 RNA in bone marrow cells is predictiv leukemia
Literature	GENERIF_SUMMARY	Cyclin D1 may play a role in the early stage of gallbladder carcinom
Literature	GENERIF_SUMMARY	experiments suggest that both catalytic and non-catalytic function pRb-mediated cell cycle exit
Literature	GENERIF_SUMMARY	Cyclin D1 may be a potential target for molecular intervention in pa cancer.
Literature	GENERIF_SUMMARY	We expressed cyclin D1 in the beta-cells of mice and islet hyperpla
Literature	GENERIF_SUMMARY	activation in breast cancer cells is mediated by mayven
Literature	GENERIF_SUMMARY	An associative interaction between XPD protein and CCND1 genet cancer risk.
Literature	GENERIF_SUMMARY	Cyclin D1, D2, or D3 expression appears to be increased and/or dy their low proliferative capacity
Literature	GENERIF_SUMMARY	marked expression in high-grade tumors supports its role in prolife
Literature	GENERIF_SUMMARY	data indicate that altered expression of beta-catenin may play an i through increased proliferation and invasiveness under epidermal not mutation or cyclin D1 expression
Literature	GENERIF_SUMMARY	cyclin D1 overexpression is associated with non-small cell lung ca
Literature	GENERIF_SUMMARY	Bcl-1 staining was similar in all benign keratoses.
Literature	GENERIF_SUMMARY	AA genotype does not affect breast cancer risk.
Literature	GENERIF_SUMMARY	Amplification of Bcl-1 is associated with the development of uterin
Literature	GENERIF_SUMMARY	To explore the potential prognostic value of cyclin D1 in invasive b
Literature	GENERIF_SUMMARY	CCND1 polymorphism is associated with an increased risk of endo
Literature	GENERIF_SUMMARY	TAF1-dependent histone acetylation facilitates transcription factor cyclin D1 transcription and ultimately G(1)-to-S-phase progression
Literature	GENERIF_SUMMARY	exposure of cells to cadmium chloride results in cytotoxicity and c consequent proteolysis of eIF4E protein, which in turn diminishes D1
Literature	GENERIF_SUMMARY	Identification of mantle cell lymphoma with low cyclin D1 3'UTR is with shorter overall survival.
Literature	GENERIF_SUMMARY	PKC-mediated exclusion of LIMK2 from the nucleus might be a me expression by LIMK2
Literature	GENERIF_SUMMARY	cyclin D1 was localized in cell nuclei
Literature	GENERIF_SUMMARY	levels of cyclin D1a and D1b alternative transcripts in mantle cell l than on CCND1 polymorphism
Literature	GENERIF_SUMMARY	cyclin D1 plays an important role in cellular proliferation and differ
Literature	GENERIF_SUMMARY	Atypical teratoid/rhabdoid tumor can be misdiagnosed as a variet potentially harbors LOH 22q. Our data indicate that cyclin D1 is a t
Literature	GENERIF_SUMMARY	Increased cyclin D1 expression seen when earlier and later stage e

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Cyclin D1 expression was significantly associated with tumour siz papillary microcarcinoma.
Literature	GENERIF_SUMMARY	cases of cyclin D1-negative mantle cell lymphoma (MCL) do exist
Literature	GENERIF_SUMMARY	an activating mutation of the beta-catenin gene affected regulatio generation of intrathoracic sporadic desmoid tumor
Literature	GENERIF_SUMMARY	the Wnt signaling pathway plays an important role in carcinogenes through overexpression of its target genes, particularly cyclin D1
Literature	GENERIF_SUMMARY	STAT5b may mediate the transcriptional activation of cyclin D1 aft
Literature	GENERIF_SUMMARY	cyclin D1 nuclear localization has a role in cancer [review]
Literature	GENERIF_SUMMARY	SMAR1 regulates cyclin D1 by modification of chromatin through t
Literature	GENERIF_SUMMARY	The binding of STAT5 to the cyclin D1 promotor might up regulate carcinoma.
Literature	GENERIF_SUMMARY	expression of cyclin D1 and c-Myc in epithelial ovarian cancer reaf components in the pathway of tumorigenesis
Literature	GENERIF_SUMMARY	p38 kinase activation is linked temporally with cyclin D1 expressio control in the adult liver.
Literature	GENERIF_SUMMARY	integrin-dependent signal transduction events regulate the express
Literature	GENERIF_SUMMARY	Cyclin D1 expression may be a useful biomarker for assessing the
Literature	GENERIF_SUMMARY	Hypermethylation of cyclin d2 is asspciated with prostate tumorig
Literature	GENERIF_SUMMARY	data support the hypothesis that the CCND1 A870G polymorphism our Indian population
Literature	GENERIF_SUMMARY	level of cyclin D1 negatively correlates with the proliferation proper
Literature	GENERIF_SUMMARY	TIMP-1-mediates cell-cycle arrest via cyclin D1 downregulation & p
Literature	GENERIF_SUMMARY	These studies indicate that the altered AR regulatory capacity of c increased prostate cancer risk and provide evidence of cyclin D1b-
Literature	GENERIF_SUMMARY	an association with alcohol consumption and the CCND1 gene or cancers
Literature	GENERIF_SUMMARY	This study demonstrates for the 1st time the involvement of MAP growth inhibition and apoptosis of human vascular smooth muscl overexpression.
Literature	GENERIF_SUMMARY	we identified ZONAB-responsive elements in cyclin D1 promoter, c
Literature	GENERIF_SUMMARY	Cyclin D1 overexpression alters the proliferation and differentiatio organotypic co-cultures.
Literature	GENERIF_SUMMARY	Our study suggests that the effect of cyclin D1 gene polymorphism males and AA/AG genotype of cyclin D1 gene is associated with a
Literature	GENERIF_SUMMARY	expression is repressed by SUMO modification of Sam68
Literature	GENERIF_SUMMARY	the subtype 2 receptor-mediated antiproliferative effect of SRIH o a decrease in cyclin D1 and cdk4 levels
Literature	GENERIF_SUMMARY	Cyclin D1 expression was not significantly different in normal cerv

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	These findings suggest heterogeneous abnormalities of CCND and dysregulated CCND and RB1 may lead to impaired cell cycle contro

Literature	GENERIF_SUMMARY	glucocorticoid receptor (GR) represses cyclin D1 via Tcf-beta-cater
Literature	GENERIF_SUMMARY	ionizing radiation is able to enhance cyclin D1 transcription induce regulation of cyclin D1 transcription by B[a]PDE or B[a]PDE plus ion
Literature	GENERIF_SUMMARY	Mantle cell lymphoma should be very sensitive to targeted therapy D1/CDK4 complex.
Literature	GENERIF_SUMMARY	Results indicate that individuals carrying the CCND1 GG genotype nasopharyngeal carcinoma.
Literature	GENERIF_SUMMARY	ERK1/2, JNK1/2 and p38 mapk pathways are all required for B[a]P
Literature	GENERIF_SUMMARY	Cyclin D1 promotes cellular motility through inhibiting ROCK signa suppressor TSP-1.
Literature	GENERIF_SUMMARY	Cav-1-deficient mammary acini displayed increased ERalpha levels stimulated growth, with specific up-regulation of cyclin D1
Literature	GENERIF_SUMMARY	Cyclin D1 is often mutated in esophageal cancer. The mutations di nuclear accumulation. An acidic residue in the C-terminus is neede glycogen synthase kinase-3 beta.
Literature	GENERIF_SUMMARY	Cyclin D1 expression was higher in benzo(a)pyrene treated embryo
Literature	GENERIF_SUMMARY	cyclin D1 expression is deregulated in idiopathic pulmonary fibrosi influences lung fibroblast proliferation
Literature	GENERIF_SUMMARY	Study evaluated associations odds ratios and 95% confidence inte genes in 1,172 non-Hodgkin lymphoma (NHL) cases and 982 popu variant G870A (rs603965) increased NHL risk.
Literature	GENERIF_SUMMARY	When the combinations of the variables were assessed in two sep variables p21/Ki-67 or p21/cyclin D1 expression were independent
Literature	GENERIF_SUMMARY	CCND1 amplification is uncommon and appears to be late event in adenocarcinoma.
Literature	GENERIF_SUMMARY	Pin1 expression is correlated with cyclinD1 expression and may ha carcinoma
Literature	GENERIF_SUMMARY	association between this CCND1 genotype and colorectal cancer r
Literature	GENERIF_SUMMARY	telomerase reverse transcriptase has a novel role in the modulatio
Literature	GENERIF_SUMMARY	novel signaling pathway links BRCA1-IRIS to cellular proliferation th this culminates in the increased expression of the cyclin D1 gene
Literature	GENERIF_SUMMARY	High levels of cyclin D1 expression is associated with salivary ade
Literature	GENERIF_SUMMARY	Cyclin D1 overexpression is associated with endometrial carcinom
Literature	GENERIF_SUMMARY	Cyclin D1 or cyclin D3 are differentially used in the distinct mitogen
Literature	GENERIF_SUMMARY	Expression of p27Kip1 in melanoma is regulated via cyclin D1 cont
Literature	GENERIF_SUMMARY	HBx and NF-kappaB2/BCL3 mediated-cyclin D1 up-regulation migh

Main Category	Category	Terms
		HCC development and progression
Literature	GENERIF_SUMMARY	The suppression of cyclin D1 levels during S phase is regulated by activity.
Literature	GENERIF_SUMMARY	Curcumin treatment inhibited cyclin D1 mRNA expression in K562
Literature	GENERIF_SUMMARY	DACH1 repressed cyclin D1 through a novel mechanism via a c-Ju alpha-helical DS domain which recruits corepressors to the local c
Literature	GENERIF_SUMMARY	After adjustment for age, sex, and smoking status, the AG genotyp overall lung cancer
Literature	GENERIF_SUMMARY	cyclin D1 may have a role in marginal zone lymphoma of mediastin
Literature	GENERIF_SUMMARY	Alternatively spliced cyclin D1 mRNA isoforms a and b are express multiple myeloma (MM). Cyclin D1b proteins are present in MCL, ra
Literature	GENERIF_SUMMARY	subcellular localization is modulated by GSK-3beta and DYRK1B by
Literature	GENERIF_SUMMARY	Cyclin D1 expression was not significantly different among 20% of squamous cell carcinoma and 20% of normal mucosa.
Literature	GENERIF_SUMMARY	PTEN may down-regulate the expression of PIP3, and then down-re leads to the suppression of cell growth.
Literature	GENERIF_SUMMARY	cyclin D1 overexpression is not a consequence of, but rather a pivo transformation in the lung and other tissues. [REVIEW]
Literature	GENERIF_SUMMARY	Cyclin D1 is expressed in several kinds of brain cells following brai
Literature	GENERIF_SUMMARY	SCF(FBX4-alphaB crystallin) is an E3 ubiquitin ligase that promotes phosphorylated cyclin D1.
Literature	GENERIF_SUMMARY	Alterations in adenomatous polyposis coli/beta-catenin pathway a pathogenesis of pleuropulmonary desmoid tumors and solitary fib
Literature	GENERIF_SUMMARY	cyclin D1 may have a central role in mediating invasion and metast signaling and matrix deposition of TSP-1 [review]
Literature	GENERIF_SUMMARY	XRCC1-01, XRCC3-01, and CCND1-01 may be predictive of survival cancer treated with DNA-damaging chemotherapy
Literature	GENERIF_SUMMARY	Expression of membranous beta-catenin in salivary adenoid cystic the patients with lymph node metastasis.
Literature	GENERIF_SUMMARY	findings suggest that CDK4 cooperation with CCND1 may be involv
Literature	GENERIF_SUMMARY	p53 and Ki-67 were expressed with increasing frequency, and bcl-2 in thyroid carcinoma progression. p27 and cyclin D1 were expresse
Literature	GENERIF_SUMMARY	By comparing the expression of p53, cyclin D1, p16, hTERT, and TS keratoacanthoma and squamous cell carcinoma, the changes in th stages of skin carcinogenesis, is defined.
Literature	GENERIF_SUMMARY	eIF4E, along with VEGF and cyclin D1, has a role in translational reg and growth
Literature	GENERIF_SUMMARY	cyclin D1 has a role in progression of germ cell tumors
Literature	GENERIF_SUMMARY	FBXW8 plays an essential role in cancer cell proliferation through p opportunities to develop therapies targeting destruction of cyclin D

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	the p38 MAPK/NF-kappaB/cyclin D1 signaling pathway might part Paget's disease
Literature	GENERIF_SUMMARY	All grade II/III meningiomas showed increased expression of cyclin the combined expression of cyclin D1 and proliferation may define aggressive biological behavior.
Literature	GENERIF_SUMMARY	deregulated expression of BRCA1-IRIS is likely to reduce depender
Literature	GENERIF_SUMMARY	Data suggest that trisomy 11 does not appear to directly cause CC
Literature	GENERIF_SUMMARY	genomic deletions in CCND1 create stable truncated cyclin D1 mR mantle cell lymphoma
Literature	GENERIF_SUMMARY	These findings uncover specific residues conferring ubiquitination for proteasomal degradation of cyclin D1.
Literature	GENERIF_SUMMARY	There was a highly significant positive association between p27(K receptor (ER/PR) status and with p27(KIP-1) and cyclin D1 express was also identified.
Literature	GENERIF_SUMMARY	Cyclin D1/cdk4-mediated phosphorylation of BRCA1 inhibits the ab promoters in vivo.
Literature	GENERIF_SUMMARY	CYCLIN D1 may be a target gene for leptin mediated growth stimu mechanisms involve activated Stat3
Literature	GENERIF_SUMMARY	The expression level of cyclin D1 and CDK4 protein increased in hu quartz.
Literature	GENERIF_SUMMARY	Interaction of MUC1 with CTNNB modulates cyclin D1 in H. pylori-i
Literature	GENERIF_SUMMARY	BCAR3 induces anti-estrogen resistance and augments transcripti
Literature	GENERIF_SUMMARY	GSK3beta may induce G(1) cell cycle arrest in a cyclin D1-depende growth-inhibitory role in A549 cells.
Literature	GENERIF_SUMMARY	PTEN/PI 3-kinase signaling and cyclin D1 control a novel pathway complex.
Literature	GENERIF_SUMMARY	findings suggested that the G870A polymorphism of cyclin D1 may in Korean men
Literature	GENERIF_SUMMARY	cyclin D1 expression in human tumoral parathyroid cells is regulate
Literature	GENERIF_SUMMARY	Amplification of CCND1 is associated with recurrence and tamoxif cancer
Literature	GENERIF_SUMMARY	The function of cyclin D1b in cell cycle regulation was investigated conditional expression of isoform b.
Literature	GENERIF_SUMMARY	a frameshift mutation (G base deletion) at nucleotide 82 of codon of glioblastoma multiform (WHO Grade IV) sample.
Literature	GENERIF_SUMMARY	Our results indicate that the down-regulation of CCND1 is an esser cancer cells.
Literature	GENERIF_SUMMARY	Taken together, our data suggest that Apr3 should play an importa
Literature	GENERIF_SUMMARY	There are significant differences between Ki-67 indices and CCND1
Literature	GENERIF_SUMMARY	Overexpression of cyclin D1 is associated with head and neck squa

Literature	GENERIF_SUMMARY	There appears to be an influence of CCND1 870AA genotypes on e with regard to tumor location, which supports the theory of prevale
Literature	GENERIF_SUMMARY	a significant proportion of pancreatic ductal adenocarcinomas is c alterations regarding p16 & cyclin D1 genes; this mechanism of ge explains in part the aggressive phenotype
Literature	GENERIF_SUMMARY	This study provides a molecular basis to support the correlation of human prostate cancer and suggests a mechanism by which this c
Literature	GENERIF_SUMMARY	Suberoylanilide hydroxamic acid caused a rapid decrease of cyclin translation of cyclin D1 by inhibiting the phosphatidylinositol 3-kina probably by PI3K inhibition
Literature	GENERIF_SUMMARY	Cyclin Dl over expression was evident among all cases of mantle c lymphoma
Literature	GENERIF_SUMMARY	RbAp48-mediated transformation of HPV16 is probably because o suppressors retinoblastoma and p53, apoptosis-related enzymes c (CCND1), and c-MYC.
Literature	GENERIF_SUMMARY	that an O(2)(*-) signaling pathway regulates NAC-induced G(1) arre increasing MnSOD activity
Literature	GENERIF_SUMMARY	There is co-expression of Cyclin D1 and BP1 in breast cancer. BP1 cancer through regulating the expression of Cyclin D1.
Literature	GENERIF_SUMMARY	Predominance of the Delta3'UTR mRNA was associated with highe did not correlate with the proliferation rate, suggesting a different r
Literature	GENERIF_SUMMARY	The expression of cyclin D1 in hypopharyngeal squamous cell carc normal epithelium.
Literature	GENERIF_SUMMARY	strong correlation between CCND1 amplification and its protein ex
Literature	GENERIF_SUMMARY	Levels of cyclin D1 gene expression were significantly higher in ma carcinoma, medullary thyroid carcinoma) compared to macroscop adenoma and/or nodular goitre groups.
Literature	GENERIF_SUMMARY	Ki-67 antibody and cyclin D1 overexpression seem to parallel each serves as a cell cycle activator in squamous cell carcinoma of the
Literature	GENERIF_SUMMARY	mahanine can reverse an epigenetically silenced gene, RASSF1A in activity that in turn down-regulates a key cell cycle regulator, cyclin
Literature	GENERIF_SUMMARY	in angiosarcoma, significant correlation was seen between phosph between phosphorylated Akt and cyclin D1
Literature	GENERIF_SUMMARY	Temporal control of cyclin D1 subcellular localization and proteoly within the mammary epithelium of transgenic mice.
Literature	GENERIF_SUMMARY	The tumor-promoting activity of cyclin D1 may be tissue specific.
Literature	GENERIF_SUMMARY	p53 and Ki-67, but not bcl-2, cyclin D1 or HER-2 may have roles in t lung carcinoma
Literature	GENERIF_SUMMARY	A431 cells expressing SIP1 along with exogenous cyclin D1 were h
Literature	GENERIF_SUMMARY	Review of cyclin D1 and cyclin G and CDK acitivty and their roles in degradation pathways as targets for cancer therapy

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	ZO-2 down-regulates cyclin D1 transcription by interacting with the histone deacetylase 1
Literature	GENERIF_SUMMARY	role for D-type cyclins in the excessive basal-cell proliferation and p psoriatic epidermis
Literature	GENERIF_SUMMARY	CCND1 polymorphism may be an early event in tumorigenesis, but
Literature	GENERIF_SUMMARY	Cyclin D1 showed significantly higher median expression in thyroid microcarcinoma compared to those without, indicating a correlatio
Literature	GENERIF_SUMMARY	This study aimed to explore, whether polymorphisms in BCL2, Cycl survival in a cohort of patients with squamous cell esophageal car identify the potential therapeutic targets.
Literature	GENERIF_SUMMARY	A high correlation between MUC1 and cyclin D1 implies MUC1 invo large subset of human papillary thyroid carcinoma and papillary m
Literature	GENERIF_SUMMARY	CCND1/GAPDH mRNA levels were significantly higher in lung canc without EGFR mutation
Literature	GENERIF_SUMMARY	Alteration of CCND1 in Chinese patients with breast carcinoma an
Literature	GENERIF_SUMMARY	roles for cyclin D1 in the development of PA and for cyclin D1 in th and carcinoma ex pleomorphic adenoma (CXPA) of parotid gland
Literature	GENERIF_SUMMARY	The positive rate of Cyclin D1 was significantly higher in colorectal malignancy, and colorectal adenoma than in normal colorectal mu
Literature	GENERIF_SUMMARY	specific overexpression of Sox11 mRNA and nuclear protein in bot be useful for the diagnosis of MCL as a complement to cyclin D1 a in MCL.
Literature	GENERIF_SUMMARY	p53 is an indispensable component of cellular signaling system wh involving Akt activation and increase in cyclin D1, thereby promotin
Literature	GENERIF_SUMMARY	that Rac1 is an essential player for mediating the induction of cycl cells
Literature	GENERIF_SUMMARY	Report a potential association of variants in the CCND1 and CDH1 unique study design with phenotypic extremes.
Literature	GENERIF_SUMMARY	Nuclear accumulation of CCND1 during S phase inhibits Cul4-depe dependent DNA rereplication.
Literature	GENERIF_SUMMARY	HSPB8 is a candidate CDK-independent cyclin D1 target that can m
Literature	GENERIF_SUMMARY	high cyclin expression may contribute to deregulation of the cell cy
Literature	GENERIF_SUMMARY	There was a positive correlation between TRAF2 and cyclin D1 exp in the epithelial cells and lymphocytes in oral lichen planus.
Literature	GENERIF_SUMMARY	polymorphic variant of Aurora A does not appear to be associated HNPCC, whereas there is a more complex relationship between the HNPCC
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism makes a significant contribution to b breast cancer in young women
Literature	GENERIF_SUMMARY	Tissue expression of cyclin D1 or E1 seems not to add independen patients with nonmuscle -invasive urothelial cell carcinoma of the
Literature	GENERIF_SUMMARY	cyclin D1 reactivity is a considerably better marker of replicative se

		galactosidase activity.
Literature	GENERIF_SUMMARY	CCND1 polymorphisms stand-in as cis-acting regulatory elements genotype and phenotype could provide valuable additional informa patients.
Literature	GENERIF_SUMMARY	PKR and PKR-like endoplasmic reticulum kinase induce the protea a mechanism requiring eukaryotic initiation factor 2alpha phospho
Literature	GENERIF_SUMMARY	investigate the status of Her2, EGFR and cyclin D1 in 95 primary br
Literature	GENERIF_SUMMARY	The Wnt pathway target gene cyclin D1 was found to be up-regulat tumors compared with controls at both mRNA and protein level, su catenin pathway
Literature	GENERIF_SUMMARY	MIF and cyclin D1 might be related to the growth and metastasis o
Literature	GENERIF_SUMMARY	alternatively spliced cyclin D1 modulates p27KIP1 binding and cell
Literature	GENERIF_SUMMARY	The A allele and AA genotype of CCND1 G870A polymorphism hav risk of the uterine leiomyoma in obese Korean women.
Literature	GENERIF_SUMMARY	Rac signaling to cyclin D1 is a crucial pro-proliferative effect of E-c
Literature	GENERIF_SUMMARY	The CCND1 G870A polymorphism is not associated with the risk o
Literature	GENERIF_SUMMARY	The results demonstrate that PI-3K/Akt-mediated cyclin D1 expres the arsenite human skin carcinogenic effect.
Literature	GENERIF_SUMMARY	metformin exerts an antitumoral effect in vitro and in vivo through
Literature	GENERIF_SUMMARY	polymorphic alleles of HER2 and CCND1 may not play an importan risk, but presence of Val allele may be useful for tumor prognosis.
Literature	GENERIF_SUMMARY	These studies suggest the endogenous cyclin D1 promoter BRG-1 scaffold in the context of local chromatin upon which coactivators cyclin D1.
Literature	GENERIF_SUMMARY	Cyclin D1 may mediate cell proliferation by different mechanisms i negative breast cancer.
Literature	GENERIF_SUMMARY	present study did not demonstrate a significant association betwe carcinoma
Literature	GENERIF_SUMMARY	Expression of cyclin D1 is accelerated independently of beta-caten
Literature	GENERIF_SUMMARY	Only FIGO stage, cyclin D1, p27 (Kip1) and Ki-67 are independent p predicting outcome of cervical cancer patients.
Literature	GENERIF_SUMMARY	Analysis of the pattern of expression of these biomolecules showe decreased cyclin D1- and pRB-positive phenotype among the invas lesions
Literature	GENERIF_SUMMARY	Cyclin D1 expression analysis in familial breast cancers may discri
Literature	GENERIF_SUMMARY	tumor cell incubation with pioglitazone results in increased levels D1
Literature	GENERIF_SUMMARY	up-regulation of cyclin D1 by inflammatory factor-1 (AIF-1) pathwa
Literature	GENERIF_SUMMARY	A certain number of cyclin D1+ and CD5- diffuse large B-cell lymph at the CCND1 locus, including the t(11;14).

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Cyclin D1 expression is an independent poor prognostic factor in w positive breast cancer who received adjuvant tamoxifen-based the
Literature	GENERIF_SUMMARY	The CCND1 A870G polymorphism had consistent associations wit neoplasms.
Literature	GENERIF_SUMMARY	The results indicate that the waiting time for onset of oncogenic vi homozygous (GG) for CCND1 genotypes (52 years) was 12 years e AG or AA genotypes (60 years).
Literature	GENERIF_SUMMARY	a reliable marker of gene aberration in plasma cell myeloma
Literature	GENERIF_SUMMARY	Report overexpression of cyclin D1, D3, and p21 in renal carcinoma
Literature	GENERIF_SUMMARY	Nerve growth factor induced the cyclin D1 promoter via Sp1, nucle element/activated transcription factor sites.
Literature	GENERIF_SUMMARY	DnaJB6 is necessary for translocation of Slfn1 into the nucleus, wh cell-cycle arrest and programmes a quiescent state of T-cells
Literature	GENERIF_SUMMARY	Cyclin D1 as a very useful proliferative marker in meningiomas.
Literature	GENERIF_SUMMARY	Cyclin E and cyclin D1 expression distinguishes non-BRCA1/2 tum BRCA2-associated tumors and may reflect different predisposition
Literature	GENERIF_SUMMARY	gene copy numbers of CCND1 in breast cancers
Literature	GENERIF_SUMMARY	11q23 deletion along with relatively strong CCND1 expression was
Literature	GENERIF_SUMMARY	Thus, an acidic environment triggers cytoplasmic localization and
Literature	GENERIF_SUMMARY	miR-34a reduces both mRNA and protein levels of cyclin D1 (CCND
Literature	GENERIF_SUMMARY	EWS-FLI1 directly stimulates cyclin D1 gene transcription.
Literature	GENERIF_SUMMARY	Genomic aberrations of Cyclin D1 in neuroblastoma indicate that c an important cell cycle aberration in this pediatric tumor.
Literature	GENERIF_SUMMARY	Id1 may contribute to early breast cancer by promoting excessive p
Literature	GENERIF_SUMMARY	Data demonstrate that RNA interference of genes encoding cyclin respectively) inhibits proliferation and is progressively cytotoxic in
Literature	GENERIF_SUMMARY	Cyclin D1 is induced in HaCaT+ by BARF1 and is overexpressed in interaction of viral BARF1 and cyclin D1.
Literature	GENERIF_SUMMARY	AP-1 activity and cyclin D1/E2F-1 expression in human embryo lun benzo(a)pyrene treatment.
Literature	GENERIF_SUMMARY	SOX2 and beta-catenin act in synergy in the transcription regulatio
Literature	GENERIF_SUMMARY	GPR30-mediated inhibition of urothelial cell proliferation is the resu of activation protein-1 signaling.
Literature	GENERIF_SUMMARY	ADAM17 mediates the EGFR/AKT/cyclin D1 pathway and cell cycle radiation
Literature	GENERIF_SUMMARY	miR-16-1 regulates CCND1 mRNA expression; role of miR-16-1 in t
Literature	GENERIF_SUMMARY	Loss of p16/Rb protein expression and overexpression of cyclin D1 37%/37% of gastric carcinomas, respectively.Cyclin D1 and CDK4 c lymph node metastasis and depth of invasion.

Literature	GENERIF_SUMMARY	Estrogen and progesterone lower cyclin B1 AND D1 expression, blo in human adrenal carcinoma cell cultures.
Literature	GENERIF_SUMMARY	A significant elevation in expression of CCND1 in oral squamous c neon-irradiated cells.
Literature	GENERIF_SUMMARY	These findings suggest that CCND1 (G870A) polymorphism may b squamous cell carcinoma of the uterine cervix in north Indian wom
Literature	GENERIF_SUMMARY	hnRNP A1 has a role in mediating rapamycin-induced alterations o dependent manner and provide the first direct link between Akt and
Literature	GENERIF_SUMMARY	Mutations in Fbx4 inhibit dimerization of the SCF(Fbx4) ligase and human cancer.
Literature	GENERIF_SUMMARY	cell cycle exit is preceded by p27-dependent inhibition of cyclin A-C reduced pre-mitotic pRb pocket protein phosphorylation
Literature	GENERIF_SUMMARY	CCND1870 GG genotype is associated with an increased risk for n high-risk area of China.
Literature	GENERIF_SUMMARY	we here propose that reactive oxygen species-mediated cyclin D1 retardation in hypoxic environments
Literature	GENERIF_SUMMARY	Overexpression of cyclin D1 is associated with cholangiocarcinom
Literature	GENERIF_SUMMARY	cyclin D1 gene targeted cell lines lost the translocated chromosom locus reverted from CpG hypomethylated to hypermethylated
Literature	GENERIF_SUMMARY	cyclin D1b protein is aberrantly regulated and could contribute to th positive breast cancer
Literature	GENERIF_SUMMARY	Results describe the effects of estradiol on cyclin D1, PS2, and c-fo RNA polymerase II on DNA templates, levels of nascent transcripts levels of RNAs.
Literature	GENERIF_SUMMARY	beta-TrCP-dependent degradation takes part in controlling cyclin D glucose starvation, which endows physiological relevance to this n
Literature	GENERIF_SUMMARY	Overexpression may reflect early genetic events during the progres carcinogenesis.
Literature	GENERIF_SUMMARY	FGFR1-IIIb and FGFR1-IIIc are coexpressed, and the FGFR1-III isofo factors and cyclin D1.
Literature	GENERIF_SUMMARY	Alterations of transcriptional regulators in disease may lead to spli
Literature	GENERIF_SUMMARY	These studies identify a novel cyclin D1/miR-17/20 regulatory feed miR-17-5p/miR-20a.
Literature	GENERIF_SUMMARY	cytosolic cyclin D1 is able to regulate apoptosis by interaction with
Literature	GENERIF_SUMMARY	These results demonstrate that ERKs and JNKs are responsible fo expression levels in human embryonic lung fibroblasts induced by
Literature	GENERIF_SUMMARY	The transcriptional activation of miR-302 and the translational repr provide a link between Oct4/Sox2 and cell cycle regulation in pluri
Literature	GENERIF_SUMMARY	The present data support a role for p27 in the assembly of D-type c cyclin D1-Cdk4-p27 assembly and kinase activation are regulated b
Literature	GENERIF_SUMMARY	Results show that VRK1 activates CREB and regulates cell cycle pr inducing cyclin D1 (CCND1) expression.

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Expression of cyclin D1 splice variants is differentially associated v patients.
Literature	GENERIF_SUMMARY	two mechanistically distinct phases of Rac-dependent cyclin D1 ex of Rac/ERK co-dependence is required for the mid-G1 phase induc entry.
Literature	GENERIF_SUMMARY	Cyclin D1 and UBCH10 amplicons in anaplastic thyroid carcinoma.
Literature	GENERIF_SUMMARY	Activated STAT3 may take effect on promoting transcription of its
Literature	GENERIF_SUMMARY	Inhibition of PI3-K/Akt induces a 40% decrease of cyclin D1 half-lif dephosphorylated/active form of GSK-3beta within the nucleus, wh thereby promoting its nuclear export.
Literature	GENERIF_SUMMARY	Overexpression of Cyclin D1 is associated with lymph node metas
Literature	GENERIF_SUMMARY	The p16INK4a/cyclin D1/pRB pathway was altered in gastrointesti
Literature	GENERIF_SUMMARY	Study shows a novel mechanism regulating Cyclin D1 expression a and associated proteins as regulators of proliferation and cancer.
Literature	GENERIF_SUMMARY	We detected a cyclin D1 overexpression exclusively in bone marro (MCL), including minimal residual infiltration.
Literature	GENERIF_SUMMARY	Wild type RASSF1A expression could induce G1 phase arrest in QG down-regulation of Cyclin D1 protein expression through a post-tra
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism is associated with breast cancer.
Literature	GENERIF_SUMMARY	results suggest that the cyclin D1 870 G>A polymorphism is possi endometrial cancer
Literature	GENERIF_SUMMARY	GG genotype of CCND1 is associated with oral premalignant lesio
Literature	GENERIF_SUMMARY	The chimeric mRNA is a bicistronic transcript of post transcriptio Cyclin D1 and Trop-2 proteins in cancer cells.
Literature	GENERIF_SUMMARY	Cyclin D1 and CDK4 were active genes and could positively regula benzo(a)pyrene.
Literature	GENERIF_SUMMARY	Polymorphisms and expression of CCND1 might modify the level workers.
Literature	GENERIF_SUMMARY	NDRG2 modulates intracellular signals to control cell cycle throug phosphorylation pathway and down-regulation of AP-1
Literature	GENERIF_SUMMARY	univariate analysis showed overexpression of cyclin D1 & underex metastases in papillary thyroid carcinomas; low risk group was cy group was cyclin D1 positive & p27 negative
Literature	GENERIF_SUMMARY	CK7, bax, CCND1, and HER2 represent marker proteins and freque ampulla of Vater.
Literature	GENERIF_SUMMARY	results show that human cyclin D1b has different biological functi properties
Literature	GENERIF_SUMMARY	cyclin D1 has a role in cisplatin chemosensitivity in oral squamous
Literature	GENERIF_SUMMARY	TsA markedly down-regulated the expression of cyclin D1 and CDK and p53 and induced cell cycle arrest at the G1 phase in MCF10A-
Literature	GENERIF_SUMMARY	Cyclin D1 activation is associated with Microsatellite instability an

		cancers.
Literature	GENERIF_SUMMARY	These results support the hypothesis that STAT3 and CREB play ar that leads to the proliferation of Ishikawa cells, thus establishing a endometrial tumorogenesis.
Literature	GENERIF_SUMMARY	CCND1 amplification showed no relationship with tumour relapse.
Literature	GENERIF_SUMMARY	c-Fos overexpression increases the proliferation of human hepatoc
Literature	GENERIF_SUMMARY	Ectopic cyclin D1 overexpression increases chemosensitivity but n
Literature	GENERIF_SUMMARY	expression unchanged in Crohn's disease, ulcerative colitis, and an
Literature	GENERIF_SUMMARY	Proliferation parameters of differentiating cells correlate with the a not of cyclin D-CDK4/6-p27 complexes.
Literature	GENERIF_SUMMARY	the G/A870 polymorphism in the CCND1 locuw does not correlate seems to be associated with esophageal adenocarcinoma patient
Literature	GENERIF_SUMMARY	The findings suggest that a thalidomide-based regimen may overc cyclin D1-negative or fibroblast growth factor receptor 3-positive p
Literature	GENERIF_SUMMARY	These data indicate that communication between ATM and cyclin genomic integrity achieved by rapid arrest of the cell-cycle, and tha susceptibility to cancer.
Literature	GENERIF_SUMMARY	UBE1L-ISG15 preferentially inhibits cyclin D1 in lung cancer
Literature	GENERIF_SUMMARY	ERKs and JNKs, but not p38, are responsible for the decrease of cy human embryonic lung fibroblasts induced by quartz.
Literature	GENERIF_SUMMARY	Over-expression of the Tp53, CCND1, and C-myc genes appears to by regulating the expression of mRNA.
Literature	GENERIF_SUMMARY	The switch from Mnt-Max to Myc-Max during bile duct ligation (ch lithocholic acid is responsible for the induction in p53 and cyclin D
Literature	GENERIF_SUMMARY	Notch-1 may be mediated through regulating the expression of cel and p21 and the activity of Akt signaling
Literature	GENERIF_SUMMARY	These results showed that the expression of cyclin D1, p21 and p2 gastric tumorigenesis and may serve as a candidate molecular ma
Literature	GENERIF_SUMMARY	Levels of cyclin D1 mRNA were specifically reduced and binding of was decreased in Mcm7-depleted cells.
Literature	GENERIF_SUMMARY	Homeobox gene CDX2 inhibits human pancreatic cancer cell prolif transcriptional activity.
Literature	GENERIF_SUMMARY	Out of 710 SNPs in 120 candidate genes, the most significant asso estrogen receptor-negative breast cancer.
Literature	GENERIF_SUMMARY	JAK2V617F-positive essential thrombocythemia and multiple mye coexist, but originate from separate clones
Literature	GENERIF_SUMMARY	The PKCalpha-ERK1/2 cascade is involved in PMA induced up-regu proliferation in human airway smooth muscle cells.
Literature	GENERIF_SUMMARY	Cdk-6 overexpression, alone or in combination with cyclin D1, strik both in vitro as well as in vivo, without inducing cell death or loss o
Literature	GENERIF_SUMMARY	These findings support CD1 genotype and protein expression as in

Literature	GENERIF_SUMMARY	Cyclins B1, D1, and E1 have distinct expressions in different breast
Literature	GENERIF_SUMMARY	found overexpression of cyclin D1 in 4 of 11 cases of extramedulla prognosis
Literature	GENERIF_SUMMARY	cyclin D1 has a role in resistance to antiestrogen arzoxifene
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism could act as a risk factor for the dev
Literature	GENERIF_SUMMARY	propose that NGX6 expression is lost in the process of human colo can inhibit expression of transcription factors AP-1 and Ets-1, and cyclin D1 promoter in human CRC
Literature	GENERIF_SUMMARY	DACH1 inhibits breast cancer cellular proliferation via cyclin D1.
Literature	GENERIF_SUMMARY	overexpressed cyclin B1, veiling the effect of cyclin D1 or cyclin E, and cell growth inhibition, which may render pulmonary cells more cancer initiation
Literature	GENERIF_SUMMARY	microRNAs that can silence cyclin D1 (CCND1) include miR-503, m suppresses the protein expression
Literature	GENERIF_SUMMARY	Cyclin D1 overexpression is associated with longer survival in colo
Literature	GENERIF_SUMMARY	Data show that DADS induces G(2)/M arrest in colon cancer SW48 of PCNA, p53 and cyclin B1 and upregulation of p21(WAF1).
Literature	GENERIF_SUMMARY	Cyclin D1 mRNA expression does not result in the production of fu lymphoma.
Literature	GENERIF_SUMMARY	The CCND1 870A allele is associated with nasopharyngeal carcino
Literature	GENERIF_SUMMARY	Data indicate that cyclin E2-Cdk2 activation by estrogen occurs via cyclin E2 downstream of cyclin D1, and does not require c-myc.
Literature	GENERIF_SUMMARY	over-expression of DIXDC1 might target p21 and cyclin D1 to prom tumorigenesis at least partially through activation of the PI3K/Akt
Literature	GENERIF_SUMMARY	Cyclin D1 interacts with both FOXO1 and FOXO3a and inhibits their promoting function.
Literature	GENERIF_SUMMARY	Cyclin D1 polymorphisms are associated with cervical cancer.
Literature	GENERIF_SUMMARY	The MAPK kinase-1/2 inhibitor, U0126, fully restored cAMP down-r fibroblasts of women with vs. without endometriosis.
Literature	GENERIF_SUMMARY	An immunohistochemical and molecular study of the BCL2, MKI67 was performed. The high level of BCL2 mRNA correlated with a hig mRNA level.
Literature	GENERIF_SUMMARY	Data show that sorafenib inhibited the raf/ MEK/ERK signal pathwa levels.
Literature	GENERIF_SUMMARY	XRCC1, CCND1 and GSTM1 polymorphisms have roles in oral leuk
Literature	GENERIF_SUMMARY	co-amplification of CCND1 and EMSY identified a poor prognostic

		patients
Literature	GENERIF_SUMMARY	Loss of cyclin D1 in ovarian cancer cells treated with SHetA2 is su this strategy is not impeded by the presence of cyclin E2.
Literature	GENERIF_SUMMARY	Results confirm the importance of alterations in CCND1 and CTTN squamous cell carcinoma, and demonstrates that there is an early the risk population.
Literature	GENERIF_SUMMARY	Cyclin D1 and pRb showed a progressive increase in expression fr relative decreases in the more advanced tumors (thick primaries a
Literature	GENERIF_SUMMARY	Immunoreactivity index of p21 and cyclin D1 is independent of the endometrium, patients' age and gynaecological history of patients
Literature	GENERIF_SUMMARY	Data show that the knockdown of cyclin D1 is compensated by the strategy would be to inhibit both cyclin D1 and cyclin D2.
Literature	GENERIF_SUMMARY	immunostaining of p16, cyclin D1, Ki-67, p53, and ProEx C was eva encompassing normal or benign epithelial lesions, low- and high-g cervical carcinoma
Literature	GENERIF_SUMMARY	cyclin D1b is specifically elevated in prostate tumorigenesis
Literature	GENERIF_SUMMARY	Data show that the inhibition of cell proliferation with L.lac CF was expression, the reduction of cyclin D1 expression, and retinoblasto
Literature	GENERIF_SUMMARY	Overexpression of Notch1 in laryngeal carcinoma cell line was cou
Literature	GENERIF_SUMMARY	IKKalpha, IKKbeta, RANK, Maspin, c-FLIP, Cip2 and cyclinD1 were f hepatocellular tumor tissue and its corresponding adjacent tissue.
Literature	GENERIF_SUMMARY	Studies indicate that mTOR inhibition treatment strategy was owin cyclin D1 regulated by mTOR signaling.
Literature	GENERIF_SUMMARY	It appears that the G870 polymorphism of CCND1 is not associate population.
Literature	GENERIF_SUMMARY	The risk of breast cancer development and prognosis may be asso genotype, which may be used as a biomarker for further studies.
Literature	GENERIF_SUMMARY	there was no significant difference in cyclin D1 expression betwee
Literature	GENERIF_SUMMARY	Amplification of both PPFIA1 and CCND1 were significantly associ phenotype but were unrelated to tumor stage or nodal stage
Literature	GENERIF_SUMMARY	Fndings suggest that the selected polymorphisms of p21, CCND1, of colorectal cancer.
Literature	GENERIF_SUMMARY	Data show that P53 can inhibit cyclin D1 promoter activity via an N binding activity increased after heat shock.
Literature	GENERIF_SUMMARY	Data show that B[a]PDE increases cyclin D1 expression, and activa pathway in Beas-2B bronchial epithelial cells.
Literature	GENERIF_SUMMARY	sox11 may be involved in the upregulation of cyclin D1 in hairy cell
Literature	GENERIF_SUMMARY	Chondrocytes in cartilage biopsies of ACH children were character mediated by STAT(signal transduction and transcription) activatio and cyclin D1
Literature	GENERIF_SUMMARY	Compared with the normal cerebellum, expression of cyclin D1 in r Upregulation correlated with metastases, pathological type, necros

Literature	GENERIF_SUMMARY	cyclin D1 can be included within an immunohistochemical panel to cervical glandular lesions and adenocarcinoma in situ.
Literature	GENERIF_SUMMARY	data show that alphaB-crystallin is highly expressed in melanocyte
Literature	GENERIF_SUMMARY	Data show that LLL12 inhibited STAT3 phosphorylation, induced ap cleaved caspase-3 and poly (ADP-ribose) polymerase, and also do both protein and messenger RNA levels.
Literature	GENERIF_SUMMARY	Tax binds the cyclin D1 promoter-proximal cyclic AMP response el phosphorylated CREB (pCREB) in vitro, and together the Tax-pCREB p300 to the promoter.
Literature	GENERIF_SUMMARY	Increased protein expression of p16 and cyclin D1 in squamous ce
Literature	GENERIF_SUMMARY	CCND3 is the primary driver of the cell cycle, in cooperation with C signaling.
Literature	GENERIF_SUMMARY	Ep-CAM or cyclin D1 expression is a unfavorable prognostic factor
Literature	GENERIF_SUMMARY	GATA3 as a gene involved in transcriptional regulation of Cyclin D1
Literature	GENERIF_SUMMARY	ZIP4 overexpression causes increased IL-6 transcription through C to increased cyclin D1 expression
Literature	GENERIF_SUMMARY	cyclin D1 expression was significantly correlated with lymphatic m papillary thyroid carcinoma.
Literature	GENERIF_SUMMARY	Breast cancer cell motility is affected by disturbing cyclin D1 levels
Literature	GENERIF_SUMMARY	There is no statistically significant association between the expres relapse of patients with laryngeal cancer.
Literature	GENERIF_SUMMARY	The water extract of the lettuce Lactuca sativa activated checkpoi p21, and downregulated the proto-oncogene cyclin D1 in HL-60 leu
Literature	GENERIF_SUMMARY	Rem2 mediates the fibroblastic growth factor 2 (FGF2) signaling p suppressing the transcriptional activity of p53 and cyclin D(1)
Literature	GENERIF_SUMMARY	High glucose stimulated mesenchymal stem cell proliferation thro via Ca(2+)/PKC/MAPKs as well as PI3K/Akt/mTOR signal pathway
Literature	GENERIF_SUMMARY	miR-193b represses cell proliferation and regulates CCND1 expres
Literature	GENERIF_SUMMARY	data do not show an association between CCND1 A870G SNP and colitis-associated colorectal neoplasia
Literature	GENERIF_SUMMARY	These results suggest that increased cyclin D1 expression, which may contribute to the feminization seen in these settings.
Literature	GENERIF_SUMMARY	CCND1 G870A single nucleotide polymorphism is associated with carcinoma in our Turkish population
Literature	GENERIF_SUMMARY	There was significant direct correlation between the expression of
Literature	GENERIF_SUMMARY	Stat3 and Cyclin D1 were overexpressed in laryngeal neoplasm tiss
Literature	GENERIF_SUMMARY	Hemin inhibits cyclin D1 and IGF-1 expression via STAT5b under hy breast cancer cells
Literature	GENERIF_SUMMARY	up regulation of EGFR, cyclin D1 and h TERT proteins correlates wi carcinoma of the larynx

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Prediction of CCND1 amplification using plasma DNA is thought to esophageal squamous cell carcinoma patients.
Literature	GENERIF_SUMMARY	These data link the SMRT corepressor directly with SRC family coa dependent gene expression.
Literature	GENERIF_SUMMARY	Genetic polymorphism of CCND1 is associated with CpG island hy especially in the advanced stage, but is independent of clinico-path
Literature	GENERIF_SUMMARY	Cyclin D1 might be involved in the process of human pulmonary ar migration stimulated by cigarette smoke extract.
Literature	GENERIF_SUMMARY	Cyclin D1's participation in a feed-forward loop could contribute to with estrogen and progesterone combinations.
Literature	GENERIF_SUMMARY	Increased expressions of PKCalpha and cyclin D1 might be involve proliferation of pulmonary artery smooth muscle cells in smokers mild to moderate COPD.
Literature	GENERIF_SUMMARY	Protein kinase C alpha promotes the proliferation of human airway asthmatic serum via up-regulation of cyclin D1 expression.
Literature	GENERIF_SUMMARY	CCND1 amplification was associated with breast cancer.
Literature	GENERIF_SUMMARY	our meta-analysis strongly suggested that the CCND1 G870A poly neck cancer risk
Literature	GENERIF_SUMMARY	cyclin D1b participates into multiple myeloma pathogenesis via pr
Literature	GENERIF_SUMMARY	Alternative splicing of the CCND1 transcript is associated with pro
Literature	GENERIF_SUMMARY	Data show that that cyclin D1 gene was amplified in 45.4% of ESC
Literature	GENERIF_SUMMARY	The G870A polymorphism in CCND1 may not contribute to the etio populations.
Literature	GENERIF_SUMMARY	BRAF V600E mutations are associated with MSI-H status and cycl subgroup of patients with poor prognosis.
Literature	GENERIF_SUMMARY	in HPV positive oropharyngeal cancer, cyclin D1 has a role in locor has a role in event and death
Literature	GENERIF_SUMMARY	Hr and VDR interact via multiple protein-protein interfaces, catalyzi remodeling and repress the transcription of VDR target genes that
Literature	GENERIF_SUMMARY	Rac1 knockdown by RNAi interference confirmed the specificity of regulation of cyclin D1, survivin, and XIAP in breast cancer cells.
Literature	GENERIF_SUMMARY	Positive correlation between high heterogeneity, centrosome abno in T1G3 bladder carcinomas.
Literature	GENERIF_SUMMARY	Treatment of HepG2 cells with HMBG1 increases expression of cy
Literature	GENERIF_SUMMARY	Expression of Slug decreases cyclin D1 expression in human prost
Literature	GENERIF_SUMMARY	Increased risk of urinary bladder cancer was associated with the c men 65 years of age and smokers. The G870A polymorphism was developing superficial urinary bladder cancer.
Literature	GENERIF_SUMMARY	Perioperative total parenteral nutrition has no significant impact or metastasis of colorectal cancer.
Literature	GENERIF_SUMMARY	Overexpression of CCND1 is associated with good response to bo

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Abolishing the expression of cyclin D1, Cdk4 or Nek2 in MCF10A h Ras(G12V) abrogated Ras-induced centrosome amplification.
Literature	GENERIF_SUMMARY	SCCA, EGFR and cyclin D1 may prove to be useful tumor markers i
Literature	GENERIF_SUMMARY	The gene expressions of cyclins D1 in Cushing's disease were sigr functioning adenomas.
Literature	GENERIF_SUMMARY	clodronate has little influence on osteoblast proliferation and extra D1 gene expression
Literature	GENERIF_SUMMARY	Expression of constitutively active mTOR conferred resistance to c expression and Rb phosphorylation, as well as cell growth.
Literature	GENERIF_SUMMARY	Overexpressions of nuclear cyclin D1 is associated with non-small
Literature	GENERIF_SUMMARY	High cyclin D1 is associated with squamous cell carcinoma in non
Literature	GENERIF_SUMMARY	the CCND1 870A gene variant may be a genetic risk factor in the in
Literature	GENERIF_SUMMARY	cyclin-D1 overexpression is associated with leiomyosarcoma.
Literature	GENERIF_SUMMARY	Findings suggest that genetic variants of A870G might be associat in colorectal cancer.
Literature	GENERIF_SUMMARY	CDKN1B polymorphism appears to be a predictive factor for breas prognostic biomarker. Larger study groups are needed to fully eluc polymorphisms in the development and prognosis.
Literature	GENERIF_SUMMARY	In HeLa cells, mir-200b directly reduced the expression of RND3 at promoted expression of the downstream protein cyclin D1 and inc
Literature	GENERIF_SUMMARY	In KRAS mutant tumors, PIK3CA mutation restores cyclin D1 expre that they are no longer dependent on KRAS and MEK/ERK signalin
Literature	GENERIF_SUMMARY	p53 Expression was statistically more common with less cyclin D1 Australian women.
Literature	GENERIF_SUMMARY	The data suggest that URG4 may play an important role in the deve partially regulating the expression of cyclin D1.
Literature	GENERIF_SUMMARY	Celastrol inhibits the proliferation and induced the apoptosis of HL regulation of p-Act and cyclin D1 expressions.
Literature	GENERIF_SUMMARY	Data demonstrate that mantle cell lymphoma with t(11;14)(q13;q3 orders of magnitude, while other B-cell lymphomas without t(11;14 significantly elevated above normal.
Literature	GENERIF_SUMMARY	COX-2 inhibitor can inhibit the expression of BCL-3 and cyclin D1 in cancer cell line SW480.
Literature	GENERIF_SUMMARY	cyclin D1 provides a transcriptional switch that allows the tumor su in cancer cells.
Literature	GENERIF_SUMMARY	The protein expression levels of Wnt1, beta-catenin and Cyclin D1 Karnofsky performance scale (KPS) score and World Health Organ gliomas.
Literature	GENERIF_SUMMARY	Data indicate that cyclin D1 (CCND1) AA genotype demonstrated i (CaP).
Literature	GENERIF_SUMMARY	show elevated La protein expression in cervical cancer tissue and levels in cervical tumor tissue lysates

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Homocysteine-induced differential activation of Ras/ERK and PI3K consequent expression of cyclins A and D1 are dependent on beta
Literature	GENERIF_SUMMARY	Cyclin D1 expression was associated with tumor stage and recurre
Literature	GENERIF_SUMMARY	Data show that proliferaton and nuclear expression of cyclin D1 an growth, suggesting that there might be a therapeutic window in wh most effective in ARPKD.
Literature	GENERIF_SUMMARY	The results reveal that knock-down of the beta-catenin gene decre beta-catenin protein in colon cancer HT-29 cells and suppresses th genes cyclin D1 and c-myc.
Literature	GENERIF_SUMMARY	Increased PRMT5 activity mediates key events associated with cyc including CUL4 repression, CDT1 overexpression, and DNA rereplic
Literature	GENERIF_SUMMARY	Novel function of cyclin D1 illustrates the interplay between tumor the attenuation of malignant behavior in breast cancers with high c
Literature	GENERIF_SUMMARY	Cyclin D1 and cyclin D-dependent kinases enhance oral keratinocy differentiation.
Literature	GENERIF_SUMMARY	SLUG inhibits the expression of UbcH5c directly through chromatin downstream effects, elevates the level of cyclin D1
Literature	GENERIF_SUMMARY	The present results demonstrate that beta-catenin and p65subunit catenin is capable of activating transcription.
Literature	GENERIF_SUMMARY	RPA1 and RPA2 overexpression seems to be more important durin carcinogenesis, showing similar kinetics with cyclin D1
Literature	GENERIF_SUMMARY	Phosphorylated Stat5 may play an important role in cyclin D1 over adenocarcinoma progression.
Literature	GENERIF_SUMMARY	Case Report
Literature	GENERIF_SUMMARY	Rare variants of CCND1 are risk factors for colorectal cancer, with polymorphisms.
Literature	GENERIF_SUMMARY	overexpression of cyclin D1 were found in cells of solid-pseudopap
Literature	GENERIF_SUMMARY	Cyclin D1 expression is associated to facial outcome after vestibu value of cyclin D1 expression is independent of tumor size and fac
Literature	GENERIF_SUMMARY	Findings support a role for the AKT-dependent regulation of AIP4/I D1 and c-MYC transcriptional responses to rapamycin.
Literature	GENERIF_SUMMARY	Cyclin D-1 protein over-expression is not associated with gene amp lesions of the breast.
Literature	GENERIF_SUMMARY	The A allele of the CCND1 G870A polymorphism may confer additi homozygosity and Chinese populations.
Literature	GENERIF_SUMMARY	beta-catenin expressed in nuclei/cytoplasm increases cyclinD1 pro proliferation.
Literature	GENERIF_SUMMARY	Results suggested that the Cyclin D1 A870G polymorphism is asso Chinese population. The Cyclin D1 AA genotype not only increased expression of Cyclin D1 in these tumors.
Literature	GENERIF_SUMMARY	Apoptosis signal-regulating kinase 1 and cyclin D1 compose a pos growth in gastric cancer

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	laryngeal cancer is characterized by high proliferative potential me mRNAs expression.
Literature	GENERIF_SUMMARY	Two alternative splicing variants of cyclin D1 are identified, cyclin D cellular migration.
Literature	GENERIF_SUMMARY	Cyclin D1 is a selective modifier of androgen-dependent signaling
Literature	GENERIF_SUMMARY	study identifies miR-378-TOB2-cyclin D1 as a functional module to signaling in cellular transformation
Literature	GENERIF_SUMMARY	Cyclin D1 overexpression was observed in 47.7% of tumors in the y young group, protein overexpression correlated with diminished di
Literature	GENERIF_SUMMARY	There appears to be an influence of CCND1 G870A/G1772C genot squamous cell carcinoma
Literature	GENERIF_SUMMARY	Cyclin D1 single nucleotide polymorphisms are associated with ora
Literature	GENERIF_SUMMARY	Cyclin D1 positive diffuse large B-cell lymphoma is a post-germina the CCND1 gene locus.
Literature	GENERIF_SUMMARY	ROC1 expression is negatively correlated with cyclin D1 expressior degradation of cyclin D1 in melanomas.
Literature	GENERIF_SUMMARY	This study is the first to demonstrate that K(+) channels such as h induced up-regulation of cyclin D1 and E expression in MCF-7 cells
Literature	GENERIF_SUMMARY	Cyclin D1 gene silence by lentivirus-mediated RNA interference ca laryngeal squamous cell carcinoma.
Literature	GENERIF_SUMMARY	Elevations in CYCLIN D1 mRNA expression in older persons may ir this transcript is occurring in an attempt to retain the muscle's prol
Literature	GENERIF_SUMMARY	EMSY amplification does occur independently of CCND1 amplifica supporting its role as a possible breast cancer oncogene
Literature	GENERIF_SUMMARY	the overexpression of cyclin D1 in rectosigmoid cancers may be m beta-catenin
Literature	GENERIF_SUMMARY	We show here, in an experimental model of cyclin D1 fusion protei D1 inhibits total mitochondrial activity
Literature	GENERIF_SUMMARY	Epstein-Barr virus nuclear antigen 3C facilitates G1-S transition by cyclin D1.
Literature	GENERIF_SUMMARY	immunohistochemical analysis of MT1 and cyclin D1 in breast can
Literature	GENERIF_SUMMARY	CCND1 amplification is more likely to be associated with breast ca
Literature	GENERIF_SUMMARY	Aurora-A overexpressing cells fail to overcome the restriction poin phosphorylation caused by reduced Cyclin D1 expression.
Literature	GENERIF_SUMMARY	The subcellular location of cyclin D1 expression in prostate cancer
Literature	GENERIF_SUMMARY	Data show that the expression of CCND1/CDKN2A correlated with
Literature	GENERIF_SUMMARY	c-Kit, p-ERK, and cyclin D1 might help to differentiate thin melanom
Literature	GENERIF_SUMMARY	Study elucidates a model to regulate glioma cell cycle progression induction and in concert its partner kinases, Cdk 4 and Cdk 6 by m
Literature	GENERIF_SUMMARY	over-expression of human OVCA1 in ovarian cancer cells leads to

Literature	GENERIF_SUMMARY	TERT expression highly correlated with cyclin D1 expression in lary
Literature	GENERIF_SUMMARY	Copy number changes at 11q13 and 8q34 harboring CCND1 and M prognosis in melanoma skin cancer.
Literature	GENERIF_SUMMARY	The C allele of the CCND1 C1722G polymorphism may be a potent advanced urothelial cancer.
Literature	GENERIF_SUMMARY	human antigen R knockdown reduces the growth and invasion of b expression of cyclin D1 and MMP-9
Literature	GENERIF_SUMMARY	The cyclin D1 870A allele is a low-penetrant risk factor for develop
Literature	GENERIF_SUMMARY	The immunoexpression of cyclin D1 was significantly increased in HPV-negative group.
Literature	GENERIF_SUMMARY	Higher expression of cyclin D1 in oral cancer appears to be closely lymph node invasion.
Literature	GENERIF_SUMMARY	CGH array indicated that cases having cyclin D1 with increased co elevated FBXO31 expression levels (P
Literature	GENERIF_SUMMARY	Result suggests that the cyclin D1 870A allele is a low-penetrant ri cancer, especially among Caucasians.
Literature	GENERIF_SUMMARY	High cyclin D1 is associated with thyroid papillary carcinoma.
Literature	GENERIF_SUMMARY	Apigenin increases CASP3 and CASP8 mRNA expression but decr HT29 cells.
Literature	GENERIF_SUMMARY	expression of LPP3 in human colon tumor (SW480) cells potentiat stability and CYCLIN-D1 synthesis
Literature	GENERIF_SUMMARY	study indicates that CCND1 rs9344 polymorphisms confer host su possesses a relative protective effect probably through the cyclin D
Literature	GENERIF_SUMMARY	the CCND1 G870A polymorphism may be an ethnicity-dependent r
Literature	GENERIF_SUMMARY	findings reveal an unexpected function of a core cell cycle protein may be beneficial also in retinoblastoma-negative cancers which a cyclin D1 inhibition
Literature	GENERIF_SUMMARY	Adrenal incidentaloma patients who also carry the polymorphic BC nodules.
Literature	GENERIF_SUMMARY	Data show that combination of siRNA-mediated inhibition of the cy chemotherapeutic agents could potentially be used to lower the ef agents and reduce drug-related toxicities.
Literature	GENERIF_SUMMARY	role of cyclin-D1 in deregulating apoptosis in mantle cell lymphom
Literature	GENERIF_SUMMARY	The expressions of CDK4 and Cyclin D1 increased along with prog and p16 decreased to the lowest level in gallbladder cancer.
Literature	GENERIF_SUMMARY	immunohistochemical expressions of cyclin D1, p16(INK4a) and K showing multinucleated giant cells
Literature	GENERIF_SUMMARY	in a cohort of patients with plasmablastic lymphoma of the oral ca gene was seen in 41% of cases with true amplification of CCND1 i
Literature	GENERIF_SUMMARY	CCND1 GG genotype was associated with a lower risk overall in ur 0.24-0.81) and bladder cancer patients (P = 0.008, OR = 0.34, 95% genotype.

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	p16(INK4a) is also a modulator of transcription and apoptosis thr transcription regulators, AUF1 and E2F1
Literature	GENERIF_SUMMARY	increased FHIT gene activity can promote apoptosis of cholangioc cyclin D1.
Literature	GENERIF_SUMMARY	reduced expression of the ATM and aberrant cyclin D1 expression malignant progression of breast carcinomas
Literature	GENERIF_SUMMARY	Apoptosis decreased in HL-60 cells with upregulated expression o
Literature	GENERIF_SUMMARY	Survival in stage I-II radiotherapy treated head and neck cancer did G870A genotype.
Literature	GENERIF_SUMMARY	significant relationship between nucleostemin and cyclin D1 expre
Literature	GENERIF_SUMMARY	Overexpression of cyclin D1 enhanced the proliferation and invasiv while reducing apoptosis.
Literature	GENERIF_SUMMARY	These results indicate that increased migration of MDA-MB-231 ce mediated by Id1 and is linked to an increase in EMT markers.
Literature	GENERIF_SUMMARY	in ovarian carcinomas, findings show that patients with high positi poor prognosis and reduced overall survival
Literature	GENERIF_SUMMARY	CCND1 rs9344 polymorphism together with smoking habit maybe prediction.
Literature	GENERIF_SUMMARY	The 5-years survival rate was 26% for the group with strong nuclea group with moderate expression of the marker.
Literature	GENERIF_SUMMARY	CCND1 A870G may be useful in predicting clinical outcome in HER treated with lapatinib plus capecitabine.
Literature	GENERIF_SUMMARY	an analysis of the combined expression of EZH2 and cyclin D1 car predictor for patients with HNSCC.
Literature	GENERIF_SUMMARY	CCND1 amplification is associated with a more aggressive phenot luminal A subtype tumours.
Literature	GENERIF_SUMMARY	We didn't reveal any important correlations between clinicopatholo expression and in non small cell lung cancer. We didn't observed a expression.
Literature	GENERIF_SUMMARY	Data show that cyclin D3 is significantly upregulated in breast can Cyclin D1 in ErbB2-positive cases.
Literature	GENERIF_SUMMARY	The aim of the present study was to explore and correlate membra expression with EGFR gene status in colorectal carcinomas
Literature	GENERIF_SUMMARY	Gene Expression ratios of CCND1 protein may predict survival and squamous cell carcinomas.
Literature	GENERIF_SUMMARY	The hypothesis that CCND1 expression determines response and and neck squamous cell carcinoma (HNSCC) patients treated with
Literature	GENERIF_SUMMARY	microRNA-365, down-regulated in colon cancer, inhibits cell cycle cancer cells by probably targeting Cyclin D1 and Bcl-2.
Literature	GENERIF_SUMMARY	Data show that CCND1 expression was an independent baseline p amyloidosis (AL).
Literature	GENERIF_SUMMARY	study demonstrates concordant cyclin D1-related induction profile

Main Category	Category	Terms
		cDNA microarray analysis.
Literature	GENERIF_SUMMARY	The cyclin D1 expression is unlikely to be useful as a prognostic m current evidence. The conclusion should be confirmed by a large w
Literature	GENERIF_SUMMARY	Cyclin D1 expression was not correlated with survival in penile can
Literature	GENERIF_SUMMARY	CCND1 amplification and co-alternation of CCND1(+) /pRb(-) /ppR evaluation of patients with esophageal cancer; patients with CCND prognosis in all the patients
Literature	GENERIF_SUMMARY	expression of cyclin D1 in papillary thyroid cancer is linked to noda regulated by Wnt/beta-catenin signaling.
Literature	GENERIF_SUMMARY	Cyclin D1 is molecularly involved in strengthening tumoral prolifera be seen as a potential blocking molecular switch in corresponding
Literature	GENERIF_SUMMARY	Resveratrol down-regulates the protein cyclin D1 and, in a concentr phosphorylation levels of protein kinase B and glycogen synthase cells.
Literature	GENERIF_SUMMARY	The high expression level of Stat3 and Cyclin D1 protein in larynge with the clinical stage, tumor differentiation and lymph node metas
Literature	GENERIF_SUMMARY	binding of ErbB3(80 KDa) on the promoter activates Cyclin D1 tran leading to an increased cell proliferation.
Literature	GENERIF_SUMMARY	results indicate a role of quinone reductase 2 in the control of AKT involvement of NQO2 in degradation of cyclin D1, as part of mecha
Literature	GENERIF_SUMMARY	Increased STAT3 and decreased cyclin D1 protein levels may contr
Literature	GENERIF_SUMMARY	Positive amplification of cyclin D1 was detected in 72% (36) of OS
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism modulated oncogenic cyclin D1b exp associated with an increased risk of gliomas in Chinese populatior
Literature	GENERIF_SUMMARY	The regulatory role of CD1 on NF-kappaB activity, was investigated
Literature	GENERIF_SUMMARY	cyclin D1 contributes to chromosomal instability and tumorigenesi program that governs chromosomal stability
Literature	GENERIF_SUMMARY	Overexpression of cyclin D1 is associated with aggressive behavio
Literature	GENERIF_SUMMARY	MUC1-C oncoprotein contributes to TCF7L2 activation and thereby cancer cells.
Literature	GENERIF_SUMMARY	CCND1 +870A>G polymorphisms and larger tumor size were asso by the log rank test and multivariate Cox proportional hazards mod
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism is associated with the increased risk colorectal cancer and in Caucasians
Literature	GENERIF_SUMMARY	Cyclin D1 overexpression is associated with oral cavity squamous
Literature	GENERIF_SUMMARY	Silica could induce the high expression of cyclin D1 and CDK4 and cell cycle changes by AP-1/cyclin D1 pathway in human embryonic
Literature	GENERIF_SUMMARY	Geranylgeranoic acid induced rapid downregulation of cyclin D1 in this may be a plausible mechanism involved in hepatoma chemop
Literature	GENERIF_SUMMARY	Rsf-1 is overexpressed in non-small cell lung cancers and contribu ERK modulation.

Literature	GENERIF_SUMMARY	This over-expressed miR-2909 was found to regulate CCND1 (Cycl
Literature	GENERIF_SUMMARY	cyclin D1 overexpression correlates strongly with patient survival i but its relationship with human papillomavirus status is very tight
Literature	GENERIF_SUMMARY	CCND1 rs9344 G>A may be a predictive and/or prognostic biomar however, prospective trials are warranted to confirm our findings
Literature	GENERIF_SUMMARY	Cyclin D1 immunohistochemical expression associates strongly w factors in primary breast carcinoma.
Literature	GENERIF_SUMMARY	Small interfering RNA silencing of cyclin D1 and BCL-2 expression of doxorubicin.
Literature	GENERIF_SUMMARY	SUMO modification of ATF3 influences CCND1/2 activity and cellu DU145 cells and explains at least in part how ATF3 functions to re
Literature	GENERIF_SUMMARY	Report association of cyclin D genetic polymorphisms with acute l
Literature	GENERIF_SUMMARY	Data indicate that estrogen induced the expression of c-Jun, Fra-1, tamoxifen (TMX) decreased the expression.
Literature	GENERIF_SUMMARY	Polymorphism in CCND1 gene is associated with breast cancer.
Literature	GENERIF_SUMMARY	overexpression of SOX11 has been demonstrated to be specific fo suggesting a diagnostic role of SOX11 expression in t(11;14)-nega
Literature	GENERIF_SUMMARY	Results of a meta-analysis suggest that the CCND1 G870A polymo for lung cancer, particularly among Asians and smokers.
Literature	GENERIF_SUMMARY	Show higher expression of cyclin D1 in parabasal layer of odontog epithelium of glandular odontogenic cysts compared to dentigerou
Literature	GENERIF_SUMMARY	the CCND1 G870A polymorphism might not be a potential candida (Meta-Analysis)
Literature	GENERIF_SUMMARY	NRAS or KIT mutations and cyclin D1 amplification can be found in sinonasal tract.
Literature	GENERIF_SUMMARY	CCND1 overexpression impacts the prognosis of ER-positive breas unselected primary breast cancer or patients treated with neoadju
Literature	GENERIF_SUMMARY	Cyclin D1 overexpression is a potential prognostic marker of prima
Literature	GENERIF_SUMMARY	The correlation between CCND1, E2F3 and miR-449b showed that E2F3 expression. This, in turn, reduced the proliferative ability of c
Literature	GENERIF_SUMMARY	In head and neck squamous cell carcinoma, a significant differenc between patients with cyclin D1-positive and -negative margins.
Literature	GENERIF_SUMMARY	KAI1/CD82 and cyclinD1 may serve as markers for determination laryngeal squamous cell carcinoma.
Literature	GENERIF_SUMMARY	Data indicate that XIAP E3 ligase mediates cyclin D1 transcription
Literature	GENERIF_SUMMARY	Data suggest that endometrioid endometrial cancer tissue have de normal tissue; down-regulation of miR-503 relieves suppression of cell cycle progression.
Literature	GENERIF_SUMMARY	Exogenous mutant cyclin D1 (T286I) accumulated in the nuclei.

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Data indicate that depletion of NFATc1, cyclin D1, CDK6, or CDK4 le phosphorylation/activation and resulted in decreased aortic smoo formation, migration, and proliferation.
Literature	GENERIF_SUMMARY	UBE2D3 participates in the process of radiosensitivity in human br cyclin D1.
Literature	GENERIF_SUMMARY	Thus, our findings highlight the cyclin D1/p21 signaling axis as a c growth initiation and local tumor cell invasion, both in vitro and in v
Literature	GENERIF_SUMMARY	Our results identify for the first time the downstream targets of ins molecular mechanism of insulin in promoting cell proliferation and
Literature	GENERIF_SUMMARY	Co-amplification of these candidate genes or the CCND1 amplifica mutations might be more important for prognosis than the presen
Literature	GENERIF_SUMMARY	The positive relation observed between tumor metastasis and cycl metastasis suggested that higher cyclin D1/p16 expression may a behavior of gallbladder malignancies.
Literature	GENERIF_SUMMARY	Results suggest that cyclin G1-induced liver tumor-initiating cells e chemoresistance of hepatoma, and may be a promising biomarker carcinoma patients.
Literature	GENERIF_SUMMARY	Post-transcriptional regulation of cyclins D1, D3 and G1 and prolife IMP-3 nuclear localization.
Literature	GENERIF_SUMMARY	Localization of CycD1 in the cytoplasm during skin differentiation detachment ability of keratinocytes committed to differentiation.
Literature	GENERIF_SUMMARY	Cyclin D1 and CDK4/6 have alternate roles in regulation of migratio
Literature	GENERIF_SUMMARY	hyperelevated cyclin D1, a marker of hyperactivation of senescent markers of senescence. inhibition of MEK was sufficient to elimina
Literature	GENERIF_SUMMARY	Findings suggest that aluminum concentration does not affect ger genes in breast tissues.
Literature	GENERIF_SUMMARY	Cyclin D1 mediates the convergence of ERalpha and growth factor growth factor genes.
Literature	GENERIF_SUMMARY	Studies suggest that Cyclin D1 (CCND1) G870A polymorphism ma
Literature	GENERIF_SUMMARY	CCND1 amplification status and CyclinD1 expression are independ cancer. High nuclear CyclinD1 expression in lymph node metastas chemotherapy.
Literature	GENERIF_SUMMARY	G870A polymorphism most likely contributes to increased suscept population, hospital-based case-control studies, and Asians.
Literature	GENERIF_SUMMARY	cyclin D1 has a role in promoting cell cycle progression by enhanci Cdk4
Literature	GENERIF_SUMMARY	Thus, the results show that CCND1 gene polymorphism may be a p survival who having metastatic disease.
Literature	GENERIF_SUMMARY	Exposure of cells to excessive H2O2 induced ubiquitin-dependent
Literature	GENERIF_SUMMARY	Neither cyclin D1 nor beta-catenin was expressed in a statistically development of MCCs is independent of beta-catenin and cyclin D suitable as prognostic markers.
Literature	GENERIF_SUMMARY	WT1 is an oncogene and promotes NSCLC cell proliferation by up-

Literature	GENERIF_SUMMARY	This study reveals a pivotal role of combined Dmp1 loss and cyclin
Literature	GENERIF_SUMMARY	Cyclin D1 was up-regulated in endometrial lesions but lacks specif neoplastic endometrial tissues.
Literature	GENERIF_SUMMARY	As2O3 induced dose-dependent and time-dependent increases in a suppression.
Literature	GENERIF_SUMMARY	Cyclin D1b expression plays a role in a part of human colorectal ca
Literature	GENERIF_SUMMARY	miR-21 controlled the expression of cyclin D1 through NFkappaB-c
Literature	GENERIF_SUMMARY	The genetic polymorphism of CCND1 A870G might be a potential l postoperative stage II and III rectal cancer patients treated with ad capecitabine and oxaliplatin.
Literature	GENERIF_SUMMARY	Cyclin D1 gene G870A variants are associated with primary brain t
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with bladder cancer.
Literature	GENERIF_SUMMARY	Treatment with metformin upregulated the expression of p21CIP a levels, both in vitro and in vivo
Literature	GENERIF_SUMMARY	SDF1 exerts a quiescent effect on resident c-kit(+) CSPCs by decre activity, stabilizing b-catenin, and affecting regulation of the cell cy
Literature	GENERIF_SUMMARY	CCND1 showed 2.5-3.5 log reduction after chemotherapy and incre
Literature	GENERIF_SUMMARY	The results suggested that HBZ suppressed cyclin D1 transcriptior
Literature	GENERIF_SUMMARY	Matrine markedly suppresses cell proliferation in rhabdomyosarco D1 mRNA and blocking the cell cycle at the G0 / G1 stage.
Literature	GENERIF_SUMMARY	a novel activity for miR-206 in skeletal muscle differentiation. Cycli further strengthens the tumor suppressor function proposed for m
Literature	GENERIF_SUMMARY	Dosage of Dyrk1a repositions cells within a p21-CycD1 signaling m to follow two distinct cell cycle exit pathways characterized by hig
Literature	GENERIF_SUMMARY	T3 throid hormone enhanced the recruitment of the TRbeta1/Oct-1 site within cyclin D1 promoter.
Literature	GENERIF_SUMMARY	ATF-3 is involved in the progress of laryngeal squamous cell carcir for evaluation of its prognosis. The oncologic role of ATF-3 may be
Literature	GENERIF_SUMMARY	DYRK1B is a novel Thr(286)-CCND1 kinase that acts independently degradation.
Literature	GENERIF_SUMMARY	the prognostic value and the oncogenic function of NOTCH3 in glio
Literature	GENERIF_SUMMARY	Report CCND1 mutations in mammary analogue secretory carcino transformation.
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism might be correlated with the suscep
Literature	GENERIF_SUMMARY	the overexpression of cyclin D1 is almost always present in CIN1 c considered as an additional diagnostic marker.
Literature	GENERIF_SUMMARY	An meta-analysis provides evidence of the association between CC nasopharyngeal carcinoma risk.
Literature	GENERIF_SUMMARY	miR-449a could modulate cell cycle and apoptosis through regulat cancer cells.

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	found and reviewed nine case-control studies on CCND1 G870A w studies on XPC Ala499Val with a total of 7,674 subjects
Literature	GENERIF_SUMMARY	Cyclin D1 has a role in prostate cancer that involves coordinating r and stem cell expanding gene expression
Literature	GENERIF_SUMMARY	Induction of Dicer by cyclin D1 coordinates microRNA biogenesis i
Literature	GENERIF_SUMMARY	These observations support hsa-miR-206 as a tumor suppressor in and CDK4 as miR-206 targets.
Literature	GENERIF_SUMMARY	This study uncovers the molecular mechanism of PRMT2 regulatin breast carcinoma.
Literature	GENERIF_SUMMARY	Altered expression of cyclin D1 is associated with lymph node met expression may therefore have clinical value as a prognostic mark
Literature	GENERIF_SUMMARY	SUMOylated RhoGDIalpha suppressed C-Jun/AP-1-dependent tran Erk, subsequently leading to the down-regulation of cyclin D1 expre
Literature	GENERIF_SUMMARY	Asymptomatic monoclonal B-cell lymphocytosis with cyclin D1 ove activation and driven by inflammatory cues.
Literature	GENERIF_SUMMARY	Analysis of a cyclinD1 mRNA directly implicated HuR in regulating
Literature	GENERIF_SUMMARY	cyclin D1 gene polymorphism CCND1 G870A is not associated wit
Literature	GENERIF_SUMMARY	Celecoxib showed considerable chemoprotective effeciency again to be independent of COX-2 expression. No evidence for higher mu observed
Literature	GENERIF_SUMMARY	Expression of beta-catenin and cyclinD1 may be used as predict m cancer
Literature	GENERIF_SUMMARY	forced expression of miR-490-3P decreased both mRNA and prote G1/S phase transition
Literature	GENERIF_SUMMARY	Urothelial bladder carcinoma displayed elevated expression for cy
Literature	GENERIF_SUMMARY	Nucleoli are rich in nucleolin, a potent transcription factor that we specifically in Mantle cell lymphoma cells and to activate Ccnd1 tr
Literature	GENERIF_SUMMARY	The prediction of CCND1 amplification by plasma DNA may be a n recurrence in patients with superficial esophageal squamous cell
Literature	GENERIF_SUMMARY	No significant association was detected between CCDN1 G870A p cancer development.
Literature	GENERIF_SUMMARY	We suggest that there is an association between cyclin D1 gene ar prognosis, and increased expression of MDR1 in multiple myeloma
Literature	GENERIF_SUMMARY	High cyclin D1 expression is associated with laryngeal squamous
Literature	GENERIF_SUMMARY	These findings may provide a novel linkage between the EGFR and of cyclin D1 by LMP1 in the carcinogenesis of NPC.
Literature	GENERIF_SUMMARY	miR-545 suppressed cell proliferation by inhibiting the expression
Literature	GENERIF_SUMMARY	It is thus inferred that gain in copy number of CCND1 is implicated carcinoma.
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism may increase the risk of HBV-relate population.

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Cyclin D1 may represent a useful marker for monitoring long-term levels of radiation.
Literature	GENERIF_SUMMARY	Interaction of phosphorylated PRs with SP1 and cyclin D1 provides active PRs to selected gene promoters relevant to breast cancer p
Literature	GENERIF_SUMMARY	Cyclin D1 expression increases in gliomas.
Literature	GENERIF_SUMMARY	Cyclin D1 and survivin may be used as molecular markers to predi
Literature	GENERIF_SUMMARY	GM-CSF accelerated the G1/S phase transition in EPCs by upregul
Literature	GENERIF_SUMMARY	Our findings indicated that cyclin D1 expression correlates with de poor prognosis in oral squamous cell carcinoma.
Literature	GENERIF_SUMMARY	we characterized 2 exceptional cases of blastoid B-cell lymphoma genetic rearrangements in the CYCLIN D1 gene locus.
Literature	GENERIF_SUMMARY	The meta-analysis results indicated that cyclin D1 is an unfavorabl
Literature	GENERIF_SUMMARY	the present meta-analysis provides evidence that genotypes for th may be not associated with genetic susceptibility of cervical cance
Literature	GENERIF_SUMMARY	SGK3 is an androgen receptor (AR) target and induces cell prolifer pathway in prostate cancer cells.
Literature	GENERIF_SUMMARY	Our study showed that p53, p21, and cyclin D1 are frequently overe Cyclin D1 overexpression is associated with increased risk of disea with AA after resection.
Literature	GENERIF_SUMMARY	Aberrant expression of both cyclin D1 and CDC6 by YB-1 over-expr carcinogenesis.
Literature	GENERIF_SUMMARY	Cyclin D1-specific CD8(+) T cells secreted TNF-alpha, IFN-gamma, indicating the presence of polyfunctional tumor-specific CD8(+) T ccRCC.
Literature	GENERIF_SUMMARY	JunB expression was significantly increased while cyclin-D1 expre eclampsia relative to control placental mesenchymal stromal cells
Literature	GENERIF_SUMMARY	our results demonstrate a combined mechanism for the anti-prolif nucleus accumulation and pRb phosphorylation in glioma cells.
Literature	GENERIF_SUMMARY	DYRK1A reduced cellular Cyclin D1 levels by phosphorylation on T degradation.
Literature	GENERIF_SUMMARY	CCND1 overexpression in non-habits associated anterior tongue c clinical aggressiveness.
Literature	GENERIF_SUMMARY	Cyclin D1 governs an essential role in the E2-dependent DNA dama function.
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism is a risk factor for the development
Literature	GENERIF_SUMMARY	High cyclin D1 expression is associated with ovarian cancer.
Literature	GENERIF_SUMMARY	CCND1 amplification was seen in 28 of 133 (21.05 %) informative D1 amplification status was detected in 6 out of 28 (21.43 %) amp
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism may increase brain tumor risk, espe

Literature	GENERIF_SUMMARY	The CCND1 G870A polymorphism may contribute to the susceptib those who were older subjects (45
Literature	GENERIF_SUMMARY	SGC7901 cells with high levels of ER-a36 expression exhibited est high levels of Cyclin D1 expression while SGC7901 cells with knoc insensitive to estrogen stimulation
Literature	GENERIF_SUMMARY	Cyclin D1 expression was seen in 67.5% of ductal carcinoma and i PgR expression (92% in this study).
Literature	GENERIF_SUMMARY	Immunohistochemical staining for DACH1, PCNA and cyclin D1 wa microarrays and correlation with clinic-pathological characteristics
Literature	GENERIF_SUMMARY	Data suggest that RKIP inhibits gastric cancer metastasis via the c genes STAT3 and cyclin D1.
Literature	GENERIF_SUMMARY	Lefty1 could regulates the cell cycle via modulating the expression decidualization in vitro.
Literature	GENERIF_SUMMARY	Bcl1 polymorphism may be one of the genetic factors in predicting Japanese patients with depression.
Literature	GENERIF_SUMMARY	Our meta-analysis provides an estimate that the presence of cyclin susceptibility to breast cancer.
Literature	GENERIF_SUMMARY	Results from case-control study and meta-analysis suggested a si G870A polymorphism and nasopharyngeal carcinoma risk in Chine
Literature	GENERIF_SUMMARY	Gene silencing of cyclin D1 leads to inhibition of the growth of hea
Literature	GENERIF_SUMMARY	In summary, this study suggested that miR-383 plays the role of tu glioma cells, and may be useful for developing a new therapeutic s
Literature	GENERIF_SUMMARY	CCND1 may be used as a prognostic biomarker for patients with re
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with pancreatic cancer.
Literature	GENERIF_SUMMARY	cyclin D1 and CDK4 protein interaction network was constructed in identified novel CDK4 protein partners.
Literature	GENERIF_SUMMARY	Expression of cycle marker cyclin D1 differs between benign and n
Literature	GENERIF_SUMMARY	results indicate that high cyclin D1 expression is associated with a
Literature	GENERIF_SUMMARY	increased expression of Cyclin D1 and Ki-67 in patients with endor endometrium and simple hyperplasia,.. Cyclin D1 expression had a
Literature	GENERIF_SUMMARY	STAT3 and cyclinD1 correlate with more aggressive tumor behavio When STAT3 and cyclinD1 are considered together, they serve as e surgically resected ESCC.
Literature	GENERIF_SUMMARY	Study identified the down-regulation of miR-576-3p in bladder canc a potential tumor suppressor in bladder cancer cells by targeting C
Literature	GENERIF_SUMMARY	evaluated the utility of cyclin D1 immunohistochemistry in identifyi helping to differentiate it from its mimics
Literature	GENERIF_SUMMARY	The coexistence of IGH-CCND1 and IGH-BCL6 rearrangements sug in the pathogenesis of DLBCL.

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	The increased expression of GSK3beta correlated positively with c
Literature	GENERIF_SUMMARY	WWOX inhibits prostate cancer progression through negatively reg arrest.
Literature	GENERIF_SUMMARY	both amplification of CCND1 and protein overexpression of cyclin metastasis in oral squamous cell carcinoma
Literature	GENERIF_SUMMARY	Data show that increased p53, together with deceased cyclin D1 a mammospheres were responsible for microRNA let-7 inhibition.
Literature	GENERIF_SUMMARY	This HBx-induced cyclin D1 upregulation might play an important r and progression.
Literature	GENERIF_SUMMARY	Diclofenac and curcumin overcome these carcinogenic effects by diminishing the expression of TERT, CDK4, CDK2, cyclin D1, and cy
Literature	GENERIF_SUMMARY	Cyclin D1 immunohistochemistry can be used in the differential di
Literature	GENERIF_SUMMARY	Notably cyclin D1 was strongly and diffusely expressed in all cases in all cases (15/15) of rhabdomyosarcomas
Literature	GENERIF_SUMMARY	results indicate that CD1 expression in childhood peripheral neuro during normal development of PSNS
Literature	GENERIF_SUMMARY	Enterovirus 71 regulated the host SHSY5Y cell cycle and cell prolif let7b and directly targeting CCND1.
Literature	GENERIF_SUMMARY	Collectively, these data are the first to define the consequence of c function and present evidence for cyclin D1b as an oncogene.
Literature	GENERIF_SUMMARY	These findings support the concept that the cell cycle regulation m and development and CCND1 A870G genotyping maybe a feasible detection
Literature	GENERIF_SUMMARY	that re-introducing CDK6, cyclin-D1 or cyclin-D2 expression partiall suppression of cell proliferation and cell cycle arrest mediated by r
Literature	GENERIF_SUMMARY	CCND1 was identified as the target gene of miR-195, which functio suppressor gene by down-regulating CCND1.
Literature	GENERIF_SUMMARY	Both cyclins D1a and D1b could promote cell proliferation, which n role of cyclin D1 variants during the precancerous cirrhotic stage o
Literature	GENERIF_SUMMARY	the high expression of TC1 was common in oral tongue squamous expression of b-catenin and cyclin D1 and the progression of oral t
Literature	GENERIF_SUMMARY	Data identified a subgroup of luminal-like breast cancer patients w a combination of altered PPP2R2A and high CCND1 expression.
Literature	GENERIF_SUMMARY	The endoplasmic reticulum is well known to be a crucial regulator role in their malignant counterparts, myeloma cells. This role involv in part by cyclin D1.
Literature	GENERIF_SUMMARY	CCND1 A870G polymorphism is not associated with prostate canc
Literature	GENERIF_SUMMARY	MiR-211 is a tumor suppressor that controls expression of Cyclin D
Literature	GENERIF_SUMMARY	Report cyclin D1 expression in well differentiated thyroid tumors o
Literature	GENERIF_SUMMARY	cyclin D1 and p27 have roles in statin-induced anti-proliferative eff
Literature	GENERIF_SUMMARY	JARID2 inhibits leukemia cell proliferation by regulating CCND1 ex

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Testing the oncogenic potential of catalytically inactive human cyc mouse model shows that the CDK-activating function of cyclin D1 chromosomal instability or mammary tumorigenesis.
Literature	GENERIF_SUMMARY	Ectopic cyclin D1 reversed miR-95-3p-mediated inhibition of invasi cyclin D1 downregulation is involved in function of miR-95-3p.
Literature	GENERIF_SUMMARY	miR-19a/Cyclin D1 axis might have promising applications as a the patients with hepatocellular carcinoma.
Literature	GENERIF_SUMMARY	Nuclear EGFR occurs in ameloblastomas in association with Cyclin
Literature	GENERIF_SUMMARY	knockdown of ILK inhibits glioma cell migration, invasion and proli and downregulation of cyclin D1. Our results suggest that ILK may glioma.
Literature	GENERIF_SUMMARY	Overexpression of miR-503 in breast cancer cell lines reduced cell cycle arrest by targeting CCND1
Literature	GENERIF_SUMMARY	cyclin-D1 and cyclin-D3 within human islet cells varies according to
Literature	GENERIF_SUMMARY	cyclin D1 expression cooperates with KRAS and PTEN alterations i serve as potential multiple molecular markers for specific subgrou markers for this type of cancer.
Literature	GENERIF_SUMMARY	DNA methylation changes in neuroblastoma affect not only promo genome and target functional chromatin domains of development
Literature	GENERIF_SUMMARY	mitotic stabilized ATF7 protein re-localizes onto chromatin at the e the cyclin D1 gene expression.
Literature	GENERIF_SUMMARY	Marine steroids as potential anticancer drug candidates
Literature	GENERIF_SUMMARY	the anti-proliferative effect of resibufogenin may be attributed to th activation of GSK-3beta
Literature	GENERIF_SUMMARY	A statistically significant lapatinib- and gefitinib-induced repression CERV196 cells.
Literature	GENERIF_SUMMARY	The findings suggest that heritable CCND1 status may influence th hepatocellular carcinoma, and that more attention should be given (Meta-analysis)
Literature	GENERIF_SUMMARY	Our results suggest that the CCND1 G870A SNP may be critically i
Literature	GENERIF_SUMMARY	our data demonstrate that miR-193b targets cyclin D1 in prostate c
Literature	GENERIF_SUMMARY	ZIP5 knockdown inhibited the proliferation, migration and invasion and E-cadherin expression, which led to the inhibition of cell progre carcinoma .
Literature	GENERIF_SUMMARY	Cyclin D1 Again Caught in the Act
Literature	GENERIF_SUMMARY	CCND1-CDK4-mediated cell cycle progression provides a competit cells in vivo.
Literature	GENERIF_SUMMARY	In G28 cells, a dosedependent induction of CDK2, p21 and cyclin D roscovitine after 72 h, however, at the highest concentration of 100 downregulated.
Literature	GENERIF_SUMMARY	mechanistic study of the molecular interactions between antizyme and ornithine decarboxylase

Literature	GENERIF_SUMMARY	Describe microcystic stromal tumor as a distinctive ovarian sex co FOXL2, SF-1, WT-1, Cyclin D1, and beta-catenin nuclear expression
Literature	GENERIF_SUMMARY	same down-regulation of cohesin targets is observed in SMC1A-m
Literature	GENERIF_SUMMARY	It is a marker of oligodendrocyte precursor cells in oligodendroglia
Literature	GENERIF_SUMMARY	Cyclin D1 loss identifies prostate tumors with small-cell differentia adenocarcinomas with poor prognosis.
Literature	GENERIF_SUMMARY	CREB activation may contribute to the induction of Ccnd1 expressi the Ccnd1 gene promoter.
Literature	GENERIF_SUMMARY	RNAi-mediated silencing of Anxa2 inhibits breast cancer cell prolif dependent pathway.
Literature	GENERIF_SUMMARY	Case Report
Literature	GENERIF_SUMMARY	ZNF322A overexpression transcriptionally dysregulates genes invo contributes to lung tumorigenesis and poor prognosis
Literature	GENERIF_SUMMARY	Ewing sarcoma cells require CDK4 and cyclin D1 for survival and a
Literature	GENERIF_SUMMARY	Both fenhexamid and cyprodinil may increase cancer cell prolifera cyclin D1 and cyclin E.
Literature	GENERIF_SUMMARY	Downregulation of microRNA33a promotes the expression CDK6, C proliferation.
Literature	GENERIF_SUMMARY	There is a significant upregulation of cyclin D1 in Ewing's sarcoma
Literature	GENERIF_SUMMARY	gankyrin regulates HIF-1alpha protein stability and cyclin D1 expre ovarian cancer cell proliferation
Literature	GENERIF_SUMMARY	cyclin D1 and other cyclins such as cyclin A regulates DNA integrit C-terminal domain
Literature	GENERIF_SUMMARY	Results reinforce the role of Cyclin D1 in the initial steps of the bre of its importance in the progression of metastatic process.
Literature	GENERIF_SUMMARY	showed that CCND1 and CDK4 mutations are associated with an i
Literature	GENERIF_SUMMARY	Data indicate that 2-Chloroadenosine reduced levels of cyclin D1, a progression.
Literature	GENERIF_SUMMARY	After lentiviral transduction of miR-17 to the target cells, gene expr expression of CCND1 gene. We found miR-17 as an attractive mole probably be used as a biomarker in TNBC
Literature	GENERIF_SUMMARY	Data indicate that single nucleotide polymorphisms (SNPs) in cycl
Literature	GENERIF_SUMMARY	Varying degrees of immunoreactivity to Cyclin D1, VEGF, and EZH2 and detection of these markers may be of value in the developmen determining which patients can benefit from them
Literature	GENERIF_SUMMARY	Results confirm that CEACAM6 promoted cell proliferation mediat
Literature	GENERIF_SUMMARY	Neuroblastoma is associated to significantly higher levels of cyclin and ganglioneuroblastoma.
Literature	GENERIF_SUMMARY	In summary, our results suggest that miR-195 acts as a suppresso cancer cells by directly targeting cyclin D1a mRNA.

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	FH535 suppressed the proliferation of HCC cells by downregulatin apoptosis
Literature	GENERIF_SUMMARY	Cyclin D1 also reversed EMT phenotypes with significantly increas cells. However, cyclin D1 siRNA have no radiosensitizing effects o EMT marker expression .Our work showed that EMT phenotypes c esophageal cancer cells can be enhanced by inhibiting cyclin D1.
Literature	GENERIF_SUMMARY	The CCND1 G870A polymorphism may be involved in the hepatoto biological marker.
Literature	GENERIF_SUMMARY	we identified a new important role of miR-195/cyclin D1 pathway t and apoptosis. In addition to these results, we also found that miR mRNA and reduced the protein level of cyclin D1.
Literature	GENERIF_SUMMARY	PPARg signaling pathway may involve in the proliferation inhibition cylcin D1 and stimulating of p21.
Literature	GENERIF_SUMMARY	FOXP3 could enhance lung adenocarcinoma cell proliferation via u checkpoint gene CCND1.
Literature	GENERIF_SUMMARY	Study suggests that cyclin D1 may be an independent prognostic f IIIA adenocarcinoma of lung.
Literature	GENERIF_SUMMARY	study highlights the importance of miR-520b in regulating the proli targeting cyclin D1, and miR-520b may represent a potential therap
Literature	GENERIF_SUMMARY	The potent antitumor activity of RHL may be mediated through dov and upregulation of BAX and Bim expression.
Literature	GENERIF_SUMMARY	All of the results confirmed that CD73 promotes the growth of hum the b-catenin/cyclin D1 signaling pathway. CD73 may be used as a
Literature	GENERIF_SUMMARY	This inhibition was accompanied by a strong decrease in G1 cyclin retinoblastoma protein (Rb) phosphorylation
Literature	GENERIF_SUMMARY	Data show that Cyclin D1 has a higher expression in breast cancer, (ER) and better prognosis.
Literature	GENERIF_SUMMARY	majority (82%) of blue nevi stained negative for p16. There was no staining in benign blue nevi and melanoma (P=0.06). Eleven (73%) with a sensitivity of 0.73 and positive predictive value of 1.0
Literature	GENERIF_SUMMARY	Data indicated that HOXA1 and CCND1 mRNA and protein express tissues, that a significant correlation was found between their expr prognostic biomarker for GC.
Literature	GENERIF_SUMMARY	Findings indicate cyclin D1 (CCND1) as a target of microRNA miR-
Literature	GENERIF_SUMMARY	The expressions of survivin and cycline D1 are positively correlated ovarian neoplasms.
Literature	GENERIF_SUMMARY	Together, these results demonstrate that PGC-1alpha regulates cel CyclinD1 and CyclinB1 by ATP and ROS.
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with non-small-cell lung can
Literature	GENERIF_SUMMARY	The CCND1 genes were found very close to the IGH locus in naive contrast, the CMYC alleles became localized closer to an IGH locus
Literature	GENERIF_SUMMARY	Results showed that Cyclin D1 mediates the functional effects of E human hepatocellular carcinoma (HCC) cells

Main Category	Category	Terms
Literature	GENERIF_SUMMARY	Analysis of ctal carcinoma in situ (DCIS) by grade suggested that t specific to low/intermediate grade DCIS . These associations with and were also found in IDC
Literature	GENERIF_SUMMARY	Increased nuclear CCND1 is a potential unfavorable prognostic fac especially those with clinical early stage (stage I+II).
Literature	GENERIF_SUMMARY	overexpression of CCND1 induced the reprogramming of differenti
Literature	GENERIF_SUMMARY	we demonstrated that upregulation of suprabasin activated the Wn nuclear localization of b-catenin and upregulation of Cyclin D1 and suprabasin plays an important oncogenic role in promoting prolife squamous cell carcinoma .
Literature	GENERIF_SUMMARY	the polymorphism rs678653 in CCND1 has no association with ca contexts.
Literature	GENERIF_SUMMARY	BRAF inhibitor therapy-associated melanocytic lesions lack the BR levels of cyclin D1 expression.
Literature	GENERIF_SUMMARY	Data show that the fusion gene cyclin D1/myotonic dystrophy kina alpha (CCND1/MRCK) mRNA is resistant to CCND1-targeted miRN
Literature	GENERIF_SUMMARY	Overexpression of cyclin D1 is an early event in gastric carcinogen
Literature	GENERIF_SUMMARY	Low expression of CCND1 is associated with recurrence in oral sq
Literature	GENERIF_SUMMARY	CND1 is a direct target of miR-193b in gastric cancer.
Literature	GENERIF_SUMMARY	Low-dose irradiation of human cells induces mitochondrial reactiv instability through nuclear retention of cyclin D1. (Review)
Literature	GENERIF_SUMMARY	Loss of PTEN, expression and cyclin D1 overexpression was seen endometrial adenocarcinomas and complex hyperplasias with aty endometrial carcinogenesis.
Literature	GENERIF_SUMMARY	Data suggest that subcellular localization of cyclin D1 (Ccnd1) is a outcome.
Literature	GENERIF_SUMMARY	CCND1 is downregulated, whereas CCND2 is not, following ionizin expressing MM cells arrested in S/G2/M, and did not differ in othe Differential expression of D-cyclin does not appear to affect cell-cy differential sensitivity to DNA damage.
Literature	GENERIF_SUMMARY	Results indicate that miR-134 played a pivotal role on NSCLC throu invasion, and promoting apoptosis by targeting oncogenic CCND1.
Literature	GENERIF_SUMMARY	the focal adhesion component paxillin is a cytoplasmic substrate o
Literature	GENERIF_SUMMARY	MEK2 was essential for the phosphorylation of MKK3/MKK6 and p expression.
Literature	GENERIF_SUMMARY	RREB1 and CCND1 gains are common in nail apparatus melanoma
Literature	GENERIF_SUMMARY	MiR-374a inactivates the PI3K/AKT axis by inhibiting CCND1, supp
Literature	GENERIF_SUMMARY	MiR-34a and CCND1 were inversely correlated.
Literature	GENERIF_SUMMARY	demonstrate that co-therapy with IRES-J007 and PP242 significant in mice and that combined inhibitor treatments markedly reduce th c-MYC transcripts in these tumors
Literature	GENERIF_SUMMARY	strong cyclin D1 expression was present in Ectomesenchymal cho

Main Category	Category	Terms
		investigated.
Literature	GENERIF_SUMMARY	miR1 expression inversely correlated with MET, cyclin D1 and CDK carcinoma cells.
Literature	GENERIF_SUMMARY	a new function for cyclin D1 in the control of redox metabolism an multiple myeloma cells with their bone marrow microenvironment.
Literature	GENERIF_SUMMARY	results demonstrated the upregulation of miR-18a promoted cell p regulating PTEN-PI3K-AKT-mTOR signaling axis, suggesting that s signaling are potential agents for the treatment of ESCC patients v
Literature	GENERIF_SUMMARY	prolyl hydroxylase 2 plays an important tumor suppressive role in l
Literature	GENERIF_SUMMARY	CCND1 plays these essential roles likely through involvement in DN
Literature	GENERIF_SUMMARY	TMPRSS4 modulates both invasion and proliferation via Slug and c pathway that may regulate metastasis and cancer progression
Literature	GENERIF_SUMMARY	PCNA, bcl-2 protein, and cyclin D1 expressions could be useful in e tumor and the aggressiveness of the clinical presentation
Literature	GENERIF_SUMMARY	Expression of the Cyclin D1, CDK4, and p53 genes are correlated w
Literature	GENERIF_SUMMARY	Data indicate that only the expression levels of cyclin D1 and cyclin correlated with piR-651 expression both in vivo and in vitro.
Literature	GENERIF_SUMMARY	Results indicate a hepatocellular carcinoma (HCC) regulatory path cyclin D1, the dysfunction of which drives proliferative character in
Literature	GENERIF_SUMMARY	Transfection of cells with ClC-3 siRNA decreased the expression o and increased the expression of cyclin dependent kinase inhibitors with p21 and p27 siRNAs depleted the inhibitory effects of ClC-3 s but not on that of cyclin D1
Literature	GENERIF_SUMMARY	miR-34a promotes the osteogenic differentiation of human adipos CYCLIN D1 coregulatory network.
Literature	GENERIF_SUMMARY	Eleven primary Glioblastomas instead exhibited low beclin-1 expre three of their recurrences exhibited an increase of beclin-1, which c Our results suggest therapy-induced degradation of cyclin D1 via a
Literature	GENERIF_SUMMARY	these results demonstrated that miR-146a-5p could suppress the p small cell lung cancer cells by inhibiting the expression of CCND1
Literature	GENERIF_SUMMARY	a RAGE-dependent polyP-mediated crosstalk between mTOR and t network can modulate important physiological processes in endot
Literature	GENERIF_SUMMARY	Results show that overexpressd TSC22D2 repressed the expressio levels.
Literature	GENERIF_SUMMARY	we verified that miR-892b regulates the p19ARF/cyclin D1/CDK6 a cancer cells and may provide a treatment option for advanced-stag
Literature	GENERIF_SUMMARY	CCND1 polymorphism is associated with gastric cancer.
Literature	GENERIF_SUMMARY	the phosphorylation levels of ErbB2, ErbB3 and Akt and the protein lapatinib treatment of HSC3, HSC4 and Ca9-22 cells
Literature	GENERIF_SUMMARY	Small Molecule Inhibition of the Ubiquitin-specific Protease USP2 A to Cell Cycle Arrest in Colorectal Cancer and Mantle Cell Lymphom
Literature	GENERIF_SUMMARY	a novel mechanism by which ZBTB33 mediates the cyclin D1/cycli

Main Category	Category	Terms
		through the G1 restriction point and accelerating cancer cell prolife
Literature	GENERIF_SUMMARY	Overexpression of cyclin D1 results in dysregulated CDK activity, ra mitogenic signaling, bypass of key cellular checkpoints, and ultima
Literature	GENERIF_SUMMARY	EGF induces hair follicle-derived mesenchymal stem cell proliferat pathways, but not through STAT-3. The G1/S transition was stimula inhibition of p16 expression.
Literature	GENERIF_SUMMARY	These findings uncover a new mechanism that is critical for the re directly relevant to primary ibrutinib resistance in MCL.
Literature	GENERIF_SUMMARY	Histone H2A T120 phosphorylation promotes oncogenic transform
Literature	GENERIF_SUMMARY	miR-202 plays an important role in regulating cell proliferation, mig directly targeting cyclin D1.
Literature	GENERIF_SUMMARY	Data suggest that gamma-tocotrienol delays cellular senescence c the cell cycle through down-regulation of expression of p16-INK4a 2A) mRNA, of expression/phosphorylation of retinoblastoma prote (CCND1).
Literature	GENERIF_SUMMARY	Gains of CCND1 is associated with hypopharyngeal squamous cel
Literature	GENERIF_SUMMARY	The rs603965 polymorphism of the cyclin D1 gene suggests an int individuals.
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with glioblastoma multiform
Literature	GENERIF_SUMMARY	The significance of cyclin D1 expression may allow its use as a bio therapy with vandetanib and 5-FU
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with Chronic myelogenous l
Literature	GENERIF_SUMMARY	Sphk1 induced NF-kappaB-p65 activation, increased expression of and thus promoted proliferation of breast epithelial cells.
Literature	GENERIF_SUMMARY	Mutation in the CCND1 gene is associated with acute myeloid leuk
Literature	GENERIF_SUMMARY	Amplification of the G1-S regulatory genes, CCNE1, CCND1 and Cd ERBB2, EGFR, or KRAS amplification in gastric adenocarcinoma.
Literature	GENERIF_SUMMARY	Amplification of 11q13 resulting in overexpression of CTTN/CCND observed in 13 of 19 ESCC cases.
Literature	GENERIF_SUMMARY	the increase of cyclin D1 expression was regulated by FoxO1. The immunity in asbestos-exposed individuals may be reduced in Treg of Treg.
Literature	GENERIF_SUMMARY	Correlating beta-catenin nuclear dynamics to cyclin D1 transcriptio accumulation rate of change of the signaling factor, and not actual transcriptional output of the pathway.
Literature	GENERIF_SUMMARY	Two different mechanisms
Literature	GENERIF_SUMMARY	Cyclin D1 expression is regulated by SOX18 in prostate cancer.
Literature	GENERIF_SUMMARY	Positivity of p53 and cyclin D1 was not found to be predictive of su might be due to the small sample size of the present survey.
Literature	GENERIF_SUMMARY	Cyclin D1 can be exploitable as a diagnostic adjunct to convention Esing sarcoma/peripheral primitive neuroectodermal tumors or ne

Literature	GENERIF_SUMMARY	cyclin D1 may be expressed in lymphoma cells without SOX11 exp
Literature	GENERIF_SUMMARY	our results do not support the concept that BclI carrier status is as cardiac dysfunction
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with oropharyngeal squamo
Literature	GENERIF_SUMMARY	Case Report
Literature	GENERIF_SUMMARY	cyclin D1 is a direct target of transcription factor SOX2 in human lu
Literature	GENERIF_SUMMARY	Cyclin D1 protein and mRNA expression levels were up-regulated b inhibited by siRNA-mediated knock-down of PKN1. The effect of R activation of the PKN1-cyclin D1 pathway in vitro
Literature	GENERIF_SUMMARY	The positive rates of MAPK and cyclin D1 in osteosarcoma were in
Literature	GENERIF_SUMMARY	Downregulation of miR-138 increases the gene and protein expres mucosa which might have a pivotal role in the disease pathogenes
Literature	GENERIF_SUMMARY	The first preclinical study evaluates the response to CDK4/6 inhibi PTEN deficiency, and it reveals an important role of cyclin D-CDK4/
Literature	GENERIF_SUMMARY	NT3 upregulates cellular proliferation, extracellular matrix protein p aortic valve interstitial cells through the Trk-Akt-cyclin D1 cascade.
Literature	GENERIF_SUMMARY	Consistently, samples from oral squamous cell carcinoma (OSCC) CREPT expression than noncancerous samples. In contrast, knock significantly reduced proliferation, colony formation and migration Myc, but promoted apoptosis.
Literature	GENERIF_SUMMARY	The results highlighted a considerable effect of miRNA-20a induct
Literature	GENERIF_SUMMARY	High Expression of CCND1 is associated with liver cancer.
Literature	GENERIF_SUMMARY	Data suggest that CDK4 (cyclin-dependent kinase 4) is degraded b (APC/C) during metaphase-anaphase transition while its main regu sequestered in cytoplasm; CDK4 protein reaccumulates in the follo nucleus and cytoplasm to facilitate nuclear import of cyclin D1; wit
Literature	GENERIF_SUMMARY	REVIEW
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with Osteosarcoma.
Literature	GENERIF_SUMMARY	Down-regulation of Mig-6 induces Cyclin D1 expression and activa overexpression of Mig-6 led to significant G1 arrest and growth inh possibly through the inhibition P-ERK and Cyclin D1.
Literature	GENERIF_SUMMARY	This study demonstrated that IB-MECA induces G1 phase cell cycl pathway in ovarian cancer cells.
Literature	GENERIF_SUMMARY	Study confirms previous observation that high cyclin D1 expressio threefold higher risk of death from breast cancer in ER-positive bre
Literature	GENERIF_SUMMARY	The study demonstrated that UCA1 is a critical regulator involved i cycle progression by promoting cyclin D1 expression.
Literature	GENERIF_SUMMARY	INSR rs1051690 SNP is associated with increased risk of gastric c and IL10 genes are not linked with the presence of gastric cancer
Literature	GENERIF_SUMMARY	Noxin facilitated the expression of Cyclin D1 and Cyclin E1 through

Main Category	Category	Terms
		2 signaling pathway, thus enhanced cell growth of breast cancer
Literature	GENERIF_SUMMARY	our data demonstrated for the first time that inhibition of RAD51 su proliferation and the growth of cervical cancer xenografts by atten functional link between RAD51 and cyclin D1 and p21
Literature	GENERIF_SUMMARY	Describe a regulatory loop miR-218-CDK6/CyclinD1-E2F1 whose di progression in gastric cancer.
Literature	GENERIF_SUMMARY	Results identified NKX2-1-binding motifs in the cyclin D1 promoter positively regulates transcription of cyclin D1 in lung adenocarcino
Literature	GENERIF_SUMMARY	HPV infection was significantly associated with amplification of bo
Literature	GENERIF_SUMMARY	These findings indicate that miRNA494 and its target cyclin D1 ma regulating the proliferation of human corneal epithelial cell.
Literature	GENERIF_SUMMARY	Authors showed that CCND1 is a direct target of miR-93, and the d pathway is responsible for the development of ventricular remodel
Literature	GENERIF_SUMMARY	We conclude that EMSY and CCND1 work in collaboration and con
Literature	GENERIF_SUMMARY	results showed that fascaplysin inhibited ovarian cancer cell prolif inducing S arrest and cell apoptosis. Treatment with fascaplysin al VEGFA expression at protein levels
Literature	GENERIF_SUMMARY	CycD1 may have prognostic significance in TNBC.
Literature	GENERIF_SUMMARY	Greater frequency of cyclin D1 expression was revealed in normal carcinomas. The distribution pattern of cyclin D1 immunoexpressi carcinoma patients.
Literature	GENERIF_SUMMARY	NVP-BEZ235-induced cyclin D1 and cyclin E1 degradation.
Literature	GENERIF_SUMMARY	miR-720 acted as a tumour suppressor in pancreatic cancer by dir
Literature	GENERIF_SUMMARY	Results suggest that dysregulation and activation of the cell cycle axis is associated with higher proliferative index in neuroendocrine
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with Myelodysplastic syndro
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with breast cancer.
Literature	GENERIF_SUMMARY	Further study revealed AP000439.3 can regulate expression of CC induction of CCND1. This finding revealed lncRNAs may serve as i expression and cell phenotype in breast cancer
Literature	GENERIF_SUMMARY	This meta-analysis suggests that the CCND1 G870A polymorphism colorectal cancer, especially that A carriers may be a major risk fa
Literature	GENERIF_SUMMARY	a role of cytoplasmic cyclin D1 in the control of MCL cell migration
Literature	GENERIF_SUMMARY	Taken together, these findings enabled us to identify a novel mech cycle's G1 phase to promote tumor proliferation by regulating cycli HCC.
Literature	GENERIF_SUMMARY	Un-methyaltion at -56 and -54 bp CpG in the CCND1 promoter serv arsenic-induced Bowen's disease patients.
Literature	GENERIF_SUMMARY	According to immunohistochemistry and immunoblot analysis, the and Ki67 in psoriasis lesions decreased after treatment and were s
Literature	GENERIF_SUMMARY	Results provide evidence that CCND1 is transcriptionally regulated

Main Category	Category	Terms
		pancreatic neoplasm cells.
Literature	GENERIF_SUMMARY	Results provide evidence that Cyclin D1 is a mediator for WDR5-inc gastric neoplasm.
Literature	GENERIF_SUMMARY	Patients with tumors with high amplification of CCND1 had an incr suggest that CCND1 amplification could be useful for predicting re
Literature	GENERIF_SUMMARY	PD-L1 protein abundance is regulated by cyclin D-CDK4 and the cu mediated degradation
Literature	GENERIF_SUMMARY	Study demonstrates a measurable nuclear expression of cyclin D1 hormone receptor-positive breast cancer. Cyclin D1 expression wa after neoadjuvant chemotherapy.
Literature	GENERIF_SUMMARY	The authors report a previously unknown long noncoding RNA whi tuned regulation of CCND1 mRNA stability, without which CCND1 e
Literature	GENERIF_SUMMARY	PSAT1, which is overexpressed in ER-negative breast cancers, is a progression via regulation of the GSK3beta/beta-catenin/cyclin D1
Literature	GENERIF_SUMMARY	The novel EGR1-CCND1 axis contributes to the G1 phase arrest an
Literature	GENERIF_SUMMARY	more than 50 cyclin D1-positive cells per high-power field were det
Literature	GENERIF_SUMMARY	Cyclin D1 is unsuitable for minimal residual disease monitoring in lymphoma.
Literature	GENERIF_SUMMARY	Findings indicate the substrate specificity of the F-box protein FBX regulated cyclin D1 protein turnover.
Literature	GENERIF_SUMMARY	cyclin D1 was downregulated, whereas Bcell lymphoma 2associate upregulated following RAC1 knockdown in colon cancer cells.
Literature	GENERIF_SUMMARY	autophagic degradation machinery and cyclin D1 linked to hepatoc
Literature	GENERIF_SUMMARY	Ectopic expression of SNHG1 inhibited miR-326 expression in nucl expression.
Literature	GENERIF_SUMMARY	A possible contribution of cyclin D1 and hnRNP-K expression in the carcinoma.
Literature	GENERIF_SUMMARY	Impact of 9p deletion and p16, Cyclin D1, and Myc hyperexpressio oligodendrogliomas.
Literature	GENERIF_SUMMARY	Functional analysis showed that the restored miR-623 expression enhance their chemosensitivity to 5-FU via the cell apoptosis path direct target gene of miR-623 in GC. The overexpressed CCND1 in miR-623 level
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with Gastric Adenocarcinom
Literature	GENERIF_SUMMARY	in oral tumor cells, overexpression of cyclin D1 occurs through the degradation pathway of cyclin D1 which may favors maintaining its demonstrated that cyclin D1 expression can be controlled by targe
Literature	GENERIF_SUMMARY	BCL2, CCND1 and COL1A1 may be key novel clinically relevant ger
Literature	GENERIF_SUMMARY	our results suggest that MICAL1 exhibits its effect on proliferation ROS-sensitive PI3K/Akt/ERK signalling in breast cancer cells
Literature	GENERIF_SUMMARY	these results define a tumor-supportive role for CDCA3.

Literature	GENERIF_SUMMARY	Suppression of miR-34c could up-regulate the expressions of its ta the effects of NEAT1 knockdown. Furthermore, overexpressed NEA and inhibited DDP-induced apoptosis and cell cycle arrest via miR-
Literature	GENERIF_SUMMARY	DMSO and the process of freezing did not significantly change the human amniotic fluid stem cells
Literature	GENERIF_SUMMARY	Overexpression of CCND1 is associated with colorectal cancer.
Literature	GENERIF_SUMMARY	High CCND1 Expression is associated with breast cancer.
Literature	GENERIF_SUMMARY	Cell cycle profiling and proliferation assays revealed that the proxi CCND1 accelerated the cell cycle and promoted cell proliferation.
Literature	GENERIF_SUMMARY	Cyclin D1 orchestrates expression of a miRNA signature that induc cyclin D1 serves both upstream and downstream of Wnt/beta-cate
Literature	GENERIF_SUMMARY	overexpressed PKM2 led to increased CCND1 and decreased CDK PKM2 led to decreased CCND1 and increased CDKN1A expressior
Literature	GENERIF_SUMMARY	miR449a5p may control squamous cell carcinoma proliferation thr expression.
Literature	GENERIF_SUMMARY	Results indicated that miR-193a-3p suppressed gastric growth and cyclin D1 (CCND1) and ETS proto-oncogene 1 (ETS1) expression.
Literature	GENERIF_SUMMARY	Authors found that the phenotypic alterations by miR-365 were par BCL2 oncogenes.
Literature	GENERIF_SUMMARY	Depletion of cyclin D1 promotes the RB-independent pro-senescen succumb to the endogenous oxidative stress levels.
Literature	GENERIF_SUMMARY	LINC00152 acts as a competing endogenous RNA (ceRNA) by spo gene, CCND1.
Literature	GENERIF_SUMMARY	uc.338 could promote proliferation and cell cycle G1/S transition, a cyclin D1 upregulation.
Literature	GENERIF_SUMMARY	Studied effects of Taxillus yadoriki and Neolitsea sericea extracts cyclin D1 proteasomal degradation.
Literature	GENERIF_SUMMARY	CCND1 mutations are associated with endometrial adenocarcinom
Literature	GENERIF_SUMMARY	This meta-analysis suggested that CCND1 rs9344 polymorphism r among Caucasians.
Literature	GENERIF_SUMMARY	Cyclin D1-dependent global transcriptional downregulation was as transcription and an accumulation of promoter-proximal paused R cyclin D1 in mantle cell lymphoma.
Literature	GENERIF_SUMMARY	The deregulation of miR-17/CCND1 axis during neuroendocrine tra cells.
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with lung adenocarcinoma.
Literature	GENERIF_SUMMARY	Down-regulation of Apaf-1 protein and the overexpression of Cyclin to an aggressive serous ovarian carcinoma with a high risk of recu chemotherapy.
Literature	GENERIF_SUMMARY	Cyclin D1b markedly amplified integrin alphavbeta3 expression, wh lipopolysaccharide stimulation.
Literature	GENERIF_SUMMARY	our study provides the first in vitro evidence highlighting the antipr

		in human Abnormal airway smooth muscle cell (ASMC) remodelin of miR-638 in ASMCs may provide a novel therapeutic strategy for asthma.
Literature	GENERIF_SUMMARY	CCND1 G870A polymorphism may increase the risk of lung cancer associated with the overall survival of small-cell lung cancer patier
Literature	GENERIF_SUMMARY	Cyclin D1 is not a specific marker of interstitial pneumonia pattern
Literature	GENERIF_SUMMARY	findings indicate that immunohistochemical assessment of cyclin prognostic biomarker for oral squamous cell carcinoma [A system
Literature	GENERIF_SUMMARY	P63alpha inhibited cyclin D1 protein expression.
Literature	GENERIF_SUMMARY	CCND1 , C-MYC , and FGFR1 amplifications were observed in 34.28 (invasive ductal breast carcinoma).
Literature	GENERIF_SUMMARY	FOXD2-AS1 could promote the growth of chondrocytes by targetin
Literature	GENERIF_SUMMARY	CyclinD1 is frequently expressed in neoplastic Langerhans cells in efficient marker to differentiate neoplastic from reactive LC prolife
Literature	GENERIF_SUMMARY	Cases of oropharyngeal cancer without human papillomavirus, but with poorer 5-year overall survival.
Literature	GENERIF_SUMMARY	Results show that CCND1 expression is regulated by LET7A which cells.
Literature	GENERIF_SUMMARY	USP22 and CCND1 levels correlate in patient lung and colorectal c indicate that targeting USP22 in combination with CDK inhibitors n patients whose tumors exhibit elevated CCND1.
Literature	GENERIF_SUMMARY	Data show when cells were treated with siRNA-dipeptidyl peptidas matrix metalloproteinases, secreted MMP2 and MMP9 was downr
Literature	GENERIF_SUMMARY	LINC01296 is an oncogenic lncRNA in osteosarcoma. The prolifera osteosarcoma cells could be effectively retarded by inhibition of LI LINC01296 on osteosarcoma was determined by cyclin D1.
Literature	GENERIF_SUMMARY	Cyclin D1 is an effector that mediates CCL2's function in cell prolif
Literature	GENERIF_SUMMARY	CNV analysis disclosed that plasma CCND1/CDKN2A ratio is corre plasma and could serve as a screening test to select potential CDK our NPC PDX model and RNA sequencing, Palbociclib, a cyclin-dep tumor effects by inducing G1 arrest.
Literature	GENERIF_SUMMARY	LOXL1-AS1 regulates prostate cancer cell proliferation and cell cyc CCND1.
Literature	GENERIF_SUMMARY	CCND1 polymorphism rs9344 may not have a role in overall cance
Literature	GENERIF_SUMMARY	Results demonstrated that CCND1 mRNA expression levels were u cells.
Literature	GENERIF_SUMMARY	knockdown of lncRNA MALAT1 inhibits the proliferation and migra the miR34a/CCND1 axis.
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with proliferation and invasi
Literature	GENERIF_SUMMARY	High CCND1 expression is associated with recurrence in papillary
Literature	GENERIF_SUMMARY	SOX11 regulation by the cell-cycle regulator cyclin D1 (CCND1) and transcription 3 (STAT3), in mantle cell lymphoma is reported.

Literature	GENERIF_SUMMARY	these findings indicate that methylationassociated silencing of mi esophageal cancer through upregulation of the expression of cycli with a high incidence of esophageal cancer.
Literature	GENERIF_SUMMARY	LncRNA H19 positively regulated cyclin D1 expression through dire muscle cells.
Literature	GENERIF_SUMMARY	set of differentially expressed microRNAs in non-small lung cance was determined as the potential prognostic biomarkers for NSCLC
Literature	GENERIF_SUMMARY	An increased expression of gamma-H2Acapital HA, Cyrillic and CC shortening, patient age and concomitant pathology in Chernobyl s
Literature	GENERIF_SUMMARY	miR-501-3p represses the growth of prostate cancer cells. CREPT miR-501-3p regulates cyclin D1 and cell growth by targeting CREPT
Literature	GENERIF_SUMMARY	9% (P
Literature	GENERIF_SUMMARY	Our results demonstrate that the bacterial effectors that inhibit tra of host cells into a phase associated with restriction of L. pneumo be a common strategy used by intracellular pathogens to manipula replication.
Literature	GENERIF_SUMMARY	Cyclin D1 is required for recruitment of G9a to target genes in chro
Literature	GENERIF_SUMMARY	Studied showed Sageretia thea extracts induced cyclin D1 degrada colorectal cancer cell line.
Literature	GENERIF_SUMMARY	Gene alterations, such as TP53 mutation, PIK3CA mutation, ERBB2 MAPK pathway alteration were associated with pCR in our study.
Literature	GENERIF_SUMMARY	Study results indicate that CCND1 amplification is associated with node negative/human epidermal growth factor receptor 2 negative patients. Moreover, luminal A CCND1-amplified tumors display ger aggressive phenotype.
Literature	GENERIF_SUMMARY	we found that LINC00473 is also required for maintaining the expr and recruiting corepressor FUS to the CCND1 promoter. Altogether CCND1 is a net effect of two antagonistic regulatory pathways
Literature	GENERIF_SUMMARY	We found that tumor expression of cyclin D1 and p53 may predict node status are independent variables associated with OS in childr
Literature	GENERIF_SUMMARY	Cyclin D1 expression is regulated by Hes3 in lung cancer cells.
Literature	GENERIF_SUMMARY	Cyclin D1 expression in >10% of positive cells was observed mostl in
Literature	GENERIF_SUMMARY	IFITM3 is overexpressed in Oral squamous cell carcinoma (OSCC) axis to mediate OSCC cell growth.
Literature	GENERIF_SUMMARY	We conclude that Ccnd1-Cdk4 activity promotes Glioblastoma diss independent mechanisms.
Literature	GENERIF_SUMMARY	CCND1 rs603965 polymorphism was significantly associated with
Literature	GENERIF_SUMMARY	Our work conclusively demonstrates that the cyclin D-Rb interactio diversity of known cyclin-based protein docking mechanisms.
Literature	GENERIF_SUMMARY	Promoter H3K4me3 was examined for two candidate genes, CCND immunoprecipitation coupled with real-time PCR (ChIP-PCR). Thes verify a relationship between H3K4me3 levels and CCND1 and ERE

Pathways	WIKIPATHWAYS	DYRK1A involvement regarding cell proliferation in brain developm
Pathways	WIKIPATHWAYS	Acute myeloid leukemia
Pathways	WIKIPATHWAYS	TROP2 regulatory signaling
Pathways	WIKIPATHWAYS	Cancer pathways
Pathways	WIKIPATHWAYS	Hallmark of cancer sustaining proliferative signaling
Pathways	WIKIPATHWAYS	Cyclin dependent kinase 4 6 inhibitors in breast cancer
Pathways	WIKIPATHWAYS	Wnt signaling in adult hippocampal neurogenesis
Pathways	WIKIPATHWAYS	ErbB signaling
Pathways	WIKIPATHWAYS	DNA damage response
Pathways	WIKIPATHWAYS	DNA damage response only ATM dependent
