General Annotations	ENTREZ_GENE_SUMMARY	The protein encoded by this gene is a member of the Ser/Thr prote to the gene products of S. cerevisiae cdc28 and S. pombe cdc2. It complex that is important for cell cycle G1 phase progression. The S phase, which is controlled by the regulatory subunits D-type cycli was shown to be responsible for the phosphorylation of retinoblas gene as well as in its related proteins including D-type cyclins, p16
