| Literature | GENERIF_SUMMARY | protein phosphatase PP2A controls Aurora-A degradation by deph enzyme |
| Literature | GENERIF_SUMMARY | Aurora-A was a sensitive marker to predict tumor recurrence in bla between immunohistochemical staining and clinical outcome. |
| Literature | GENERIF_SUMMARY | Aurora-A is amplified and overexpressed in esophageal squamous |
| Literature | GENERIF_SUMMARY | Here, we report an intramolecular inhibitory regulation in Aurora-A and the C-terminal catalytic domain (aa 129-403, Cd). |
| Literature | GENERIF_SUMMARY | AURAK was inhibited by MLN8054 and caused spindle pole and ch |
| Literature | GENERIF_SUMMARY | Aurora A may play a very important role in the carcinogenesis of pr |
| Literature | GENERIF_SUMMARY | a positive relationship between Aurora A expression and treatment |
| Literature | GENERIF_SUMMARY | We propose that AURKAIP1 might function upstream of the Az1 by promote recognition, targeting to proteasome and subsequent deg |
| Literature | GENERIF_SUMMARY | Aurora-A amplification was strongly associated with a high fractio microsatellite instability, nor with the promoter methylation phenot |
| Literature | GENERIF_SUMMARY | Patients with urothelial cell carcinoma and elevated levels of STK1 course than patients with low levels |
| Literature | GENERIF_SUMMARY | These results identify a GEF-H1-dependent mechanism to modulat the control of mitotic kinases. |
| Literature | GENERIF_SUMMARY | Aurora-A-mediated phosphorylation of RASSF1A is a novel mechan to interact with microtubules and modulate M-phase cell cycle pro |
| Literature | GENERIF_SUMMARY | due to low number of cases, we are not able to state that statistica mRNA expression exist between columnar-lined oesophagus & Ba positive immunostaining |
| Literature | GENERIF_SUMMARY | Our study demonstrates that STK15 F31I SNP is associated with a |
| Literature | GENERIF_SUMMARY | Here, we show that interactions between the prometastatic scaffo Aurora A (AurA) kinase at the basal body of cilia causes phosphory disassembly. |
| Literature | GENERIF_SUMMARY | AURKA polymorphism and over expression is associated with brea |
| Literature | GENERIF_SUMMARY | These results suggest that Rho GTPases function in G2/M transiti pathways converging to centrosomal activation of Aurora-A. |
| Literature | GENERIF_SUMMARY | New light on AURKA expression and regulation in epithelial cancer marker and as a potential therapeutic target per se. |
| Literature | GENERIF_SUMMARY | Aurora-A kinase is overexpressed by a substantial proportion of ov amplification and poor prognosis andsurvival. |
| Literature | GENERIF_SUMMARY | Higher BTAK expression was found in ovarian cancer cells compar mutation or strong family history. |
| Literature | GENERIF_SUMMARY | ectopically BRCA2-expressing cells have different intracellular leve suggesting a BRCA2-mediated suppression of polyploidy via stabil |
| Literature | GENERIF_SUMMARY | TPX2 binding decreases the size and accessibility of a hydrophobi |

| Literature | GENERIF_SUMMARY | study reports that the synergistic action of Bora & the kinase Auro phase & promotes Aur-A-mediated activation of Polo-like kinase 1, mitotic entry |
| Literature | GENERIF_SUMMARY | data demonstrate that the initial activation of PLK1 is a primary fu |
| Literature | GENERIF_SUMMARY | Aurora A expression defines a population of breast cancer patients |
| Literature | GENERIF_SUMMARY | RASSF1A may function as a scaffold to bring together Aurora-A an |
| Literature | GENERIF_SUMMARY | Chromosome nucleation is involved in spindle pole separation and function of TPX2 is required to bipolarize spindles. |
| Literature | GENERIF_SUMMARY | A novel function of Aurora-A, the regulation of ch-TOG and MCAK I pole integrity. |
| Literature | GENERIF_SUMMARY | Aur-A acted through a downstream MAP kinase pathway to promo in nasopharyngeal tumorigenesis. |
| Literature | GENERIF_SUMMARY | Aurora-A transcriptional silencing seems to confer cancer cells a g indicating Aurora-A as a possible gene target in cancer therapy |
| Literature | GENERIF_SUMMARY | These antibodies specifically recognize endogenous Aurora-A in b experiments. |
| Literature | GENERIF_SUMMARY | AURA is a novel target of transcriptional regulation by histone dea |
| Literature | GENERIF_SUMMARY | The findings provide the first evidence of Aurora-A, in association v kinetochore/chromatin associated microtubule formation in huma |
| Literature | GENERIF_SUMMARY | analysis of the negative feedback regulation of Aurora-A via phosp |
| Literature | GENERIF_SUMMARY | The two investigated single nucleotide polymorphisms in AURKA v risk. |
| Literature | GENERIF_SUMMARY | the downregulation of STK15 expression led to cell arrest in the G( cells. |
| Literature | GENERIF_SUMMARY | Overexpression of AURKA can cause aneuploidy in urothelial cells, biomarker for detection of bladder cancer. |
| Literature | GENERIF_SUMMARY | Pdx-1-driven overexpression of aurora a kinase induces mild ducta mice. |
| Literature | GENERIF_SUMMARY | Aurora-A kinase overexpression in chronic lymphocytic leukemia m abnormalities and is a potential target for therapeutic intervention. |
| Literature | GENERIF_SUMMARY | identified DNA copy number gains at 20q13.2-q13.3 (AURKA locus accompanied dysregulation of DNA Damage Response genes in hi |
| Literature | GENERIF_SUMMARY | overexpression of Aurora-A may stabilize Cyclin B1 through inhibiti |
| Literature | GENERIF_SUMMARY | Aurora kinases A and B overexpression is a relatively early phenom tumorigenesis. |
| Literature | GENERIF_SUMMARY | the AURKA/GSK-3beta interaction is important in regulating beta-c |
| Literature | GENERIF_SUMMARY | the mitotic kinases Aurora A and Aurora B are regulated by EWS-Fl |

| | | cancer stem cells (BCSCs) phenotypes and drug resistance. It sho transactivate the expression of target genes, which also include FO transcriptional target of FOXM1. |
| Literature | GENERIF_SUMMARY | C-A-T haplotypes combined with betel nut chewing lead to a high r |
| Literature | GENERIF_SUMMARY | In patients who received alisertib for advanced or metastatic uroth observed in carriers of the minor allele A of rs2273535 in AURKA t allele T. |
| Literature | GENERIF_SUMMARY | This is the first study that links Twist1 in a feedback loop with its a inhibition of AURKA and Twist1 will be synergistic in inhibiting pan |
| Literature | GENERIF_SUMMARY | our identification of the novel interaction between Aurora A and H- Ras-MAPK signaling opens the way for studies into perturbation o MAPK signaling. |
| Literature | GENERIF_SUMMARY | AURKA protein over expression is associated with poor prognosis |
| Literature | GENERIF_SUMMARY | A central role of Aurora kinase A (AURKA) in promoting Epithelial-t phenotypes via ALDH1A1. |
| Literature | GENERIF_SUMMARY | Studies indicate function of aurora kinase A (AURKA) in controllin AURKA in early G1. |
| Literature | GENERIF_SUMMARY | In all, these data suggest that Aurora A plays a pivotal role in regul represents a new therapeutic target in castrate-resistant prostate c |
| Literature | GENERIF_SUMMARY | Results indicate that microRNA miR-124 inhibited glioblastoma gro Aurora kinase A (AURKA), which may represent promising targets a |
| Literature | GENERIF_SUMMARY | Data suggest that the activity of AURKA might be regulated by UBE anaphasepromoting complex. |
| Literature | GENERIF_SUMMARY | Taken together, our data suggest that Aurora-A plays an important phosphorylation of Akt, which in turn prevents autophagy-induced |
| Literature | GENERIF_SUMMARY | MiR-124-3p has significant impact on proliferation, migration and a |
| Literature | GENERIF_SUMMARY | AURKA promotes cancer metastasis by regulating epithelial-mese hepatocellular carcinoma. |
| Literature | GENERIF_SUMMARY | Switching Aurora-A kinase on and off at an allosteric site has been |
| Literature | GENERIF_SUMMARY | These results demonstrate that miR-124 is an important downstre AURKA axis is essential for the proliferation and growth of human |
| Literature | GENERIF_SUMMARY | Aurora-A may serve as a predictive biomarker of radiation respons resistance. |
| Literature | GENERIF_SUMMARY | The combination also reduces the growth of PDAC xenografts in v methyltransferases of the H3K9 pathway in cells, which are arreste methylation at centromeres, induces mitotic aberrations, triggers a leads to mitotic catastrophe |
| Literature | GENERIF_SUMMARY | Metformin disrupts malignant behavior of oral squamous cell carc Aurora-A. Findings showed that a novel Late SV40 Factor and Auro metformin as potential oral squamous cell carcinoma therapeutics |
| Literature | GENERIF_SUMMARY | Prostate cancer cells expressing an S273A mutant of CHIP have a compared with cells expressing wild-type CHIP, supporting the idea ligase activity for the AR |

| Literature | GENERIF_SUMMARY | we identified two modules with the AURKA gene and the DUSP1 ge of those genes was associated with the poorest prognosis in clinic |
| Literature | GENERIF_SUMMARY | Upon phorbol 12-myristate 13-acetate treatment, THP-1 cells diffe resulting in a reduction in H3S10 phosphorylation. The AURKA inhi demethylase KDM6B, dissociating AURKA and YY1 from the KDM6 |
| Literature | GENERIF_SUMMARY | The present study confirmed that pAURKA is important in the deve novel functional link between PTEN, AURKA and pAURKA activatio |
| Literature | GENERIF_SUMMARY | Results found that PARP10 interacted with Aurora A, and inhibited signaling. |
| Literature | GENERIF_SUMMARY | we took advantage of a chemical and chemical-genetic approach t prometaphase. We observed that a loss of Aurora A activity directl maintaining the checkpoint protein Mad2 on unattached kinetocho SAC, even in the presence of nocodazole or Taxol. |
| Literature | GENERIF_SUMMARY | These results suggest that Aurora A activity is involved in the main between the Golgi apparatus and centrosome. |
| Literature | GENERIF_SUMMARY | lncRNA TUG1 associates with advanced disease and worse progn proliferation and represses cell apoptosis via targeting AURKA |
| Literature | GENERIF_SUMMARY | our results indicate that none of the AURKA polymorphisms are as distinct Chinese populations. Further studies with larger sample si our results. |
| Literature | GENERIF_SUMMARY | AURKA protein was overexpressed in nearly all dermatofibrosarcor significantly correlated with CD34 protein levels. |
| Literature | GENERIF_SUMMARY | Aurora A-dependent phosphorylation of CENP-A at the inner centro cohesion fatigue until the last kinetochore is attached to spindle m |
| Literature | GENERIF_SUMMARY | Study confirms that AURKA influences deregulation of Wnt and Ra lines, and suggests mechanisms in CRC cell lines describing these |
| Literature | GENERIF_SUMMARY | Data suggest that this Plk1-PP6 interaction generates a feedback l Plk1 and Aurora A during mitotic entry and is terminated by the de mechanism for the previously puzzling observation of the Plk1-dep |
| Literature | GENERIF_SUMMARY | The inverse correlation between the VHL gene expression profile a cancer xenografts models. Taken together, these results suggeste for predicting the efficacy of AURKA inhibitors. |
| Literature | GENERIF_SUMMARY | Results show that a fraction of cytoplasmic AURKA is associated v interacting with mitochondrial proteins. Further data identify the m mitochondrial morphology, because an N-terminally truncated vers does not affect the mitochondrial network. |
| Literature | GENERIF_SUMMARY | Inhibition of AURKA led to strong cytotoxicity to gastric cancer cell which were caused by activating the calpain pathway. |
| Literature | GENERIF_SUMMARY | MMSET is a regulator of p53 stability via methylation of AURKA in |
| Literature | GENERIF_SUMMARY | Study identified, for the first time, a functional crosstalk between p cells. The data demonstrate that PKD2 is catalytically active durin depletion of PKD2 causes delay in mitotic entry due to downregula overexpression of Aurora A. |
| Literature | GENERIF_SUMMARY | This study aimed at further elucidation of mechanisms governing and the aurora A kinase specific inhibitor in the IMR-32 and CHP-1 |

| Main Category | Category | Terms |
|---|---|---|
| | | context of the possible stimulation of autophagy |
| Literature | GENERIF_SUMMARY | AURKA directly regulates mitochondrial functions and that AURKA by increasing mitochondrial interconnectivity. |
| Literature | GENERIF_SUMMARY | AurA is activated by the CXCL12-CXCR4 pathway in an ERK1/2-dep survival, radio-resistance, self-renewal, and proliferation regardless CXCL12-mediated migration of glioblastoma cells in vitro and the i favors the pro-migratory activity of the Rho-GTPase CDC42 by CXC |
| Literature | GENERIF_SUMMARY | Cells lacking ARID1A show enhanced AURKA transcription, which l protein for G2/M transition and mitotic entry. |
| Literature | GENERIF_SUMMARY | Data indicate the roles and mechanisms of aurora kinase A (Aurora centrosome cycles and in the DNA damage response{Review]. |
| Literature | GENERIF_SUMMARY | findings reveal that BRCA2-deficient cancer cells show enhanced s which points at an actionable dependency of genomically unstable |
| Literature | GENERIF_SUMMARY | Epithelial ovarian cancer (EOC) cell apoptosis rate was repressed a after treatment with lncRNA TUG1 inhibitor. AURKA expression but adversely regulated by lncRNA TUG1 mimic and inhibitor. In conclu inhibits cells apoptosis through regulating AURKA in EOC cells. |
| Literature | GENERIF_SUMMARY | Although the study did not meet its primary endpoint, a subset of p features supporting Aurora-A and N-myc activation achieved signif |
| Literature | GENERIF_SUMMARY | AURKA and HDAC2 genes were significantly overexpressed in all g AURKA genes was detected in the presence of metastasis and was |
| Literature | GENERIF_SUMMARY | Study revealed that Aurora A expression was significantly higher in than in parental cells. miR8853p could target Aurora A directly acti cells. |
| Literature | GENERIF_SUMMARY | knockdown of AURKA suppressed cell proliferation, migration and oxygen species generation in Oral squamous cell carcinoma. |
| Literature | GENERIF_SUMMARY | residual disease and acquired resistance in response to EGFR inhil |
| Literature | GENERIF_SUMMARY | temporal and spatial Aurora kinase-mediated regulation of SPICE1 |
| Literature | GENERIF_SUMMARY | Dephosphorylation of FZR1 by PRL-3 facilitates the activity of APC aggressive characteristics and overall progression of colorectal ca |
| Literature | GENERIF_SUMMARY | AURKA acting as an effective biomarker for BC detection and prog |
| Literature | GENERIF_SUMMARY | Study indicated that AURKA, CDC20 and TPX2 are over-expressed their higher mRNA expression levels have a worse prognosis. |
| Literature | GENERIF_SUMMARY | Mitotic regulators TPX2 and Aurora A protect DNA forks during rep |
| Literature | GENERIF_SUMMARY | EGFR-Aurka Signaling Rescues Polarity and Regeneration Defects Asymmetric Divisions |
| Literature | GENERIF_SUMMARY | Atherosclerosis-increased Linc00299 acts as a sponge of miR-490 proliferation and migration in vascular smooth muscle cells and Hu |
| Literature | GENERIF_SUMMARY | New type of interaction between the SARAH domain of the tumour |
| Literature | GENERIF_SUMMARY | The Investigational Aurora A Kinase Inhibitor Alisertib in Adult Pati |
| Literature | GENERIF_SUMMARY | Results found that over-expression and hyper-activation of AUROR BCR-ABL1 TK activity and is enhanced by Imatinib (IM) resistance |

| | | FOXM1 over-expression induce IM resistance by activating multipl advantage of leukemic hematopoiesis. |
| Literature | GENERIF_SUMMARY | MiR-154 inhibits cells proliferation and metastasis in melanoma by indicator. |
| Literature | GENERIF_SUMMARY | AURKA polymorphisms are susceptible factors for oral cancer |
| Literature | GENERIF_SUMMARY | The role of aurora A and polo-like kinases in high-risk lymphomas. |
| Literature | GENERIF_SUMMARY | Quantitative characterization of the monobody-AurA interactions a resolution structures of inhibiting and activating complexes, reveal modulation of AurA. Furthermore, the monobodies are extremely s closest homolog AurB. |
| Literature | GENERIF_SUMMARY | findings of an Aurora A-mediated interaction of Merlin with alpha-t cell cycle progression |
| Literature | GENERIF_SUMMARY | Aurora kinase A phosphorylates SLAN at T573 which results in a b |
| Literature | GENERIF_SUMMARY | aberrantly methylated AURKA and Fos proto-oncogene may be pot hepatocellular carcinoma. |
| Literature | GENERIF_SUMMARY | Aurora kinase A stabilizes FOXM1 to enhance paclitaxel resistance |
| Literature | GENERIF_SUMMARY | Aurora kinase A enhances viral replication and expression indepen |
| Literature | GENERIF_SUMMARY | Results show that AURKA is significantly upregulated in dedifferen Welldifferentiated (WD) LPS, and DD LPS patients with high AURKA recurrencefree survival than those with low expression. This study predicting poor prognosis in LPS. |
| Literature | GENERIF_SUMMARY | AURKA (rs1047972 and rs911160), AURKB (rs2241909 and rs2289 higher risk of GC susceptibility in Bosnian population. |
| Literature | GENERIF_SUMMARY | In cancer-like contexts, AURKA actively promotes DNA repair, it act invasion, and it localises at mitochondria to regulate mitochondria |
| Literature | GENERIF_SUMMARY | Our study found that miR-26a-5p could inhibit cell proliferation and carcinoma cells by targeting aurora kinase A. |
| Literature | GENERIF_SUMMARY | High aurora kinase expression identifies patients with muscle-inva neoadjuvant chemotherapy. |
| Literature | GENERIF_SUMMARY | The results signify mPOU as a negative regulator of skeletal muscl AurkA in skeletal myogenesis. |
| Literature | GENERIF_SUMMARY | This review highlights the physiological and pathophysiological pro complex and the main structural features that can be explored for |
| Literature | GENERIF_SUMMARY | Aurora-A reduces radiotherapy-induced apoptosis by activating NF hepatocellular carcinoma radioresistance. |
| Literature | GENERIF_SUMMARY | High AURORA-A expression is associated with radio-resistance of |
| Literature | GENERIF_SUMMARY | Epigenetic regulation of AURKA by miR-4715-3p in upper gastroint |
| Literature | GENERIF_SUMMARY | Aurora A site-specific phosphorylation in TACC3 regulates formati assembly in human cells. |
| Literature | GENERIF_SUMMARY | A selective Aurora-A 5'-UTR siRNA inhibits tumor growth and meta |
| Literature | GENERIF_SUMMARY | Aurora A Kinase Inhibition Destabilizes PAX3-FOXO1 and MYCN ar |
